NEW CHINA WALL RISES BUT IT'S IN MOSCOW.

MOSCOW (Reuters) — Workmen today completed the erection of a six-foot-high wooden wall around the Lenin Mausoleum in Moscow's Red Square, apparently to fore-stall possible Chinese demonstrators.

A policeman in the square said the wall was erected because of repairs to the mausoleum, which would stay closed to visitors for two months.

Nearly 70 Chinese students were involved in a melee with Russians outside the tomb last Wednesday, and the Chinese Embassy later claimed 30 were beaten by Russian police.

Rich Mineral Strike Made Under Water

By AB KENT
Times Business Editor

The most exciting mineral discovery since the molybdenum balloon went up five years ago has focused scientific mining and political attention on B.C. undersea territories.

PUT CAPS AT END, ARMY TOLD

TOKYO (Reuters) — The Liberation Army of China has been told it must not drag people through the streets wearing dunce's caps, the Peking correspondent of the Japanese newspaper Sankei Shimbun reported today.

The order came in an eight-point directive announced Monday which also included a ban on physical punishment, detention and house searches.

WIRE BRIEFS

Strike Spreading

MONTREAL (CP) — About 2,100 interns and resident doctors began a 24-hour labor protest today by withdrawing their services in 43 teaching hospitals in the province.

Interns Walk Out

MONTREAL (CP) — About 2,100 interns and resident doctors began a 24-hour labor protest today by withdrawing their services in 43 teaching hospitals in the province.

Crash Kills 3

SAN ANTONIO, Tex. (UPI) — A Saturn airways four-engine aircraft, carrying a 10,000-pound cargo for the air force, smashed to earth in dense fog today, killing all three men on board.

Ministers Slam War

WASHINGTON (UPI) — About 2,000 ministers, priests, rabbis and laymen from 45 states conducted a silent prayer vigil in front of the White House today to protest the immorality of the warfare in Vietnam."

March in Hanoi

MOSCOW (AP) — Chinese students and diplomats staged a "hooligan spectacle" with a provocative demonstration" at the gates of the Soviet Embassy in Hanoi, North Vietnam, Monday. Izvestia reported tonight.

They assayed up to 38.1 per cent on Page 2.

'End the Bugging Probe, Pass New Laws' — Stupich

Premier Bennett Monday was asked to dismiss the Sargent Royal Commission on "bugging."

Dave Stupich (NDP — Nainam) told the legislature the royal commission is not needed to protect people against electronic eavesdropping.

What is needed, he said, is legislation to end the evil. The Sargent commission seems far more interested in "listening in" on private conversations than in investigating the extent of bugging, said Mr. Stupich in the throne speech debate.

"They just want to get in on the eavesdropping," he added. Speaker W. H. Murray asked

Mr. Stupich to show more respect for the commission.

"I don't have any particular respect for it," Mr. Stupich replied.

The commission is currently in session in Vancouver. It was established by cabinet order after police seized bugging equipment used in a Vancouver hotel during a trade union convention. The commission was found to be improperly constituted and was dissolved, then later reformed with new terms of reference.

Mr. Stupich said the matter grew from a breakaway move by a group within the Inter-

national Pulp, Sulphite and Paper Mill Workers' Union. The breakaway group formed the Canadian Pulp and Paper Workers' Union, but the B.C. Labor Relations Board refused to certify it.

The battle between the two unions was highlighted by the bugging incident. An officer of the international was blamed for eavesdropping on the Canadian union officers.

Mr. Stupich said the royal commission was "established when the premier saw a golden opportunity to drive a wedge between the NDP party and the pulp mill workers." (The party would have to support one side or the other.)

He charged also that the decision to refuse certification to the Canadian union was "a political decision made in the premier's office."

"That's a complete falsehood," said Premier Bennett.

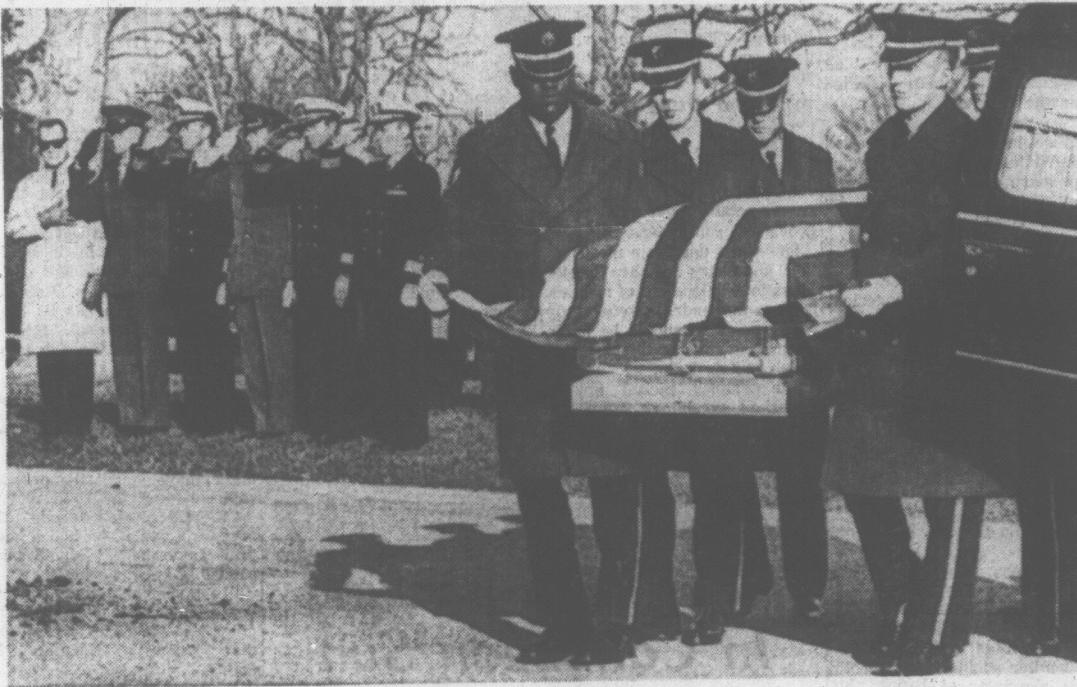

He said the decision was not made in the premier's office, directly or indirectly.

"Surely you haven't been trying to buy the premier's Continued on Page 2

Oxygen Fire Kills Another In Space Cabin Experiment

—AP Wirephoto

ASTRONAUTS Virgil Grissom, Edward White and Roger Chaffee were given hero's burials today. Here airmen carry Grissom's flag-draped casket from hearse in Arlington National Cemetery near Washington, D.C.

CLAWED AT CAPSULE HATCH

Tape Caught Screams Of Dying Astronauts

(Times News Services)

CAPE KENNEDY — Two newspapers today report that tape recordings indicate the Apollo astronauts spent a horrifying 12 to 15 seconds trying to escape the flames in their capsule before they perished.

The New York Times said the three men lived for 12 seconds after discovering fire in the sealed craft. It said they tried desperately to escape, and left a tape-recorded legacy that ended: "We're on fire ... get us out of here."

Mr. Cuccia's trailers were transported from Caldwell, Idaho, to Prince Rupert, B.C., making part of the journey via the British Columbia ferry system, and then were placed aboard the Matanuska for delivery to Sitka, their final destination.

The Washington Star, quoting a space agency worker at the manned spaceflight centre in Houston, said there were about 15 seconds of "horrible screaming" following the first report of fire.

The Washington Star, quoting a space agency worker at the manned spaceflight centre in Houston, said there were about 15 seconds of "horrible screaming" following the first report of fire.

The Times' story gives this account:

The astronauts' last moments, clocked at 12 seconds, were described by an engineer who spent most of the day listening to tape recordings of the fatal test and who heard reports from men on the launching pad at the time of the tragedy.

Chaffee and Lt.-Col. Virgil I. (Gus) Grissom and Edward W. White II of the air force were scrambling, clawing and pounding to open the sealed hatch and escape the inferno in their Apollo cockpit, the source said.

The issue was thrashed out for two weeks last fall during an interim supply bill and on Dec. 7 when Mr. Hellyer delivered a 15,000-word speech to introduce the motion for second reading.

Opposition MPs Monday repeated their demand that hearings on the bill be held by the special defence committee before the House is asked to approve it in principle. The government has insisted on following the regular procedure under which committee study follows second reading.

PUBLIC STAYS AWAY

But the hatch was unyielding, he said, and they had no time to reach for the ratchet that is normally used to unscrew it. There was no automatic release button.

The first hint of trouble, ac-

Uncle Zeke hopes them off shore mineral explorers kin find a couple o' brass Gibbs-Stewarts he lost off Brotchie Ledge last year.

Seems like Mister Hellyer's gittin' uniformly criticized.

Rain an' frost ain't so bad when they ain't simultaneous.

2nd Airman Hurt In Rabbit Test

SAN ANTONIO, Tex. (AP) — A fire similar to the one that killed three Apollo 1 astronauts Friday at Cape Kennedy, Fla., raced through a space cabin simulator today at the School of Aerospace Medicine, killing one airman and critically injuring another.

Initial reports said the inside of the pressure chamber was "completely charred," as was the Apollo craft at Cape Kennedy.

A Brook Air Force Base spokesman said the airmen were performing maintenance in a pressurized environment of 100-per-cent oxygen in an experiment designed to study the effects of pure oxygen on the blood of rabbits.

Ten of 12 rabbits in the chamber were killed. The spokesman said the airmen were in the chamber to monitor and tend to the rabbits.

The atmosphere chamber is a large rectangle with part glass on one side and with double atmospheric locks, so that a person can go into a tiny room, close the door and then open another to step into the main chamber to prevent the pressure dropping.

The cabin, essentially a long steel cylinder, is in the centre of a large space chamber building. Related experiments are often conducted with volunteer airmen accepted from among basic trainees.

CHAMBER HAS HATCH

The chamber, about 20 feet long, sits on a three-foot-high foundation. Over-all, it is about nine feet high, allowing a man to stand up inside, where the diameter is some six feet. There is a hatch at one end.

The Apollo capsule, on the other hand is a 12-foot-high cone-shaped vehicle. It is \$12,000, 10 inches across at the base and weighs 12,000 pounds.

One observer said that, although the pressure in the Apollo was considerably greater than in the San Antonio chamber, the pure-oxygen environment would tend to make the fires burn similarly.

The chamber's pressure simulated that experienced at 18,000 feet altitude.

Topple Sukarno?

JAKARTA (Reuters) — Sen. Robert F. Kennedy said today after talks with President Charles de Gaulle that the United States will be "in far greater difficulty than I have thought" if it rejects a possible French peacemaking role in Vietnam.

The Democratic senator from New York conferred with de Gaulle for 65 minutes.

"I think that without any question France and Gen. de Gaulle are going to play an important role in any successful effort that we may have in finding a peaceful solution to the struggle in Vietnam," Kennedy told newsmen.

"If that is not recognized by the spokesmen in Washington, then we are in greater difficulty than I have thought," he said.

He described his talk with de Gaulle as "very informative and very helpful to me."

The French president was a known admirer of the senator's brother, President John F. Kennedy.

De Gaulle is known to favor U.S. commitment to a definite withdrawal of its troops to prepare for peace negotiations.

The city originally offered increases ranging between four and seven per cent over two years plus a flat \$700 for each member.

The men earn an average of \$5,600 a year.

The brief said changes may have to be made in divorce court structure to lower the cost of divorce.

The police's brotherhood has asked that the present basic salary of a first class constable be raised to \$7,300 from the current \$6,350.

The city has offered \$7,000 and \$7,300.

Marriage Too Important to Waste On Children, Women's Group Says

OTTAWA (CP) — The legal age limits were set by the provinces, the brief said.

Presented by Mrs. F. E. Underhill of London for the 700,000-member organization, the brief recommended widening divorce laws to include insanity, cruelty and desertion as well as adultery.

Amendments to the divorce act should be approved by each province at its own discretion.

Another recommendation asked that the wife be allowed to sue for divorce in the province where she lived with her husband. At present, the wife

must sue in the province where her husband now lives.

The brief said changes may have to be made in divorce court structure to lower the cost of divorce.

The lack of money required to institute the legal process to obtain a divorce has caused many people to live common law.

This illegal state caused suffering to children of such a union and engendered lack of respect for the law and the marriage state.

CABINET RAKED

Early Years Of Education Said Ignored

By JOHN MIKA
Legislative Reporter

Education department policies were given a severe going over in the legislature Monday in two maiden speeches by opposition MLAs with local government experience.

Leading off was Mrs. Eileen E. Daily (NDP — Burnaby North), former teacher and 10-year veteran school trustee, who charged the government is "placing barriers before many students" in the public school system.

She said only 26 of the 87 school districts are able to provide kindergartens for children when they are in the critical formative years that frequently decided their future abilities to move ahead in the school system.

"Out of approximately 40,000 five-year-olds in our province," only 13,000 had the benefit of a school kindergarten program last year," she said. In contrast, kindergarten is a basic part of public school in most provinces and other countries.

FUTURE OUTLOOK "I have always been disturbed that almost twice as much money is spent on secondary education as is spent on elementary," she added. "The impact of learning in these early years most certainly sets the pattern for the child's whole future attitude to learning in the senior grades."

Here is the area where 'educational accidents' can be prevented from developing."

She said school entitlement grants should be raised so boards could provide smaller classes, remedial teachers, counsellors and other specialists without overburdening local taxpaying.

She also pointed out immigration adds about 10,000 pupils to the enrolment in the province's public schools each year which requires at least 350 more teachers but barriers are put in the way of teachers who would immigrate here.

TEACHER AIDS Lay personnel should be employed to relieve teachers of non-professional chores such as marking papers, supervising playgrounds and laboratories to free them for their primary role.

More adequate grants are needed for retarded children's classes by placing this under the auxiliary services' vote of the provincial budget.

Mrs. Daily also blasted the education department for failing behind almost every other province in providing teachers with modern tools.

"There is only one province in Canada which spends less on visual education equipment

HERO'S WELCOME Monday was given 15-year-old Heather Fraser, (right) returning home with Canadian junior ladies' figure skating crown, won Saturday in Toronto. Heather was met by schoolmates and

teachers from St. Ann's Academy, waving welcome signs. Here Heather, carrying newly-won trophy in case, has flowers presented her by Victoria and Deirdre Humphries. (Strickland photo.)

BY OTTAWA

Glue-Sniffing Curbs Planned

OTTAWA (CP) — Federal authorities are working on plans to provide legal controls on such hazardous pastimes as glue-sniffing, reliable sources say.

END BARRIERS

"Therefore, I heartily endorse any measure which will help break down the financial barriers to higher education which now exist in our province."

BUILDING-FREEZE

Barry Clark (L — North Vancouver-Seymour) a municipal councillor, won applause when he criticized the government's "construction freeze" on schools approved by ratepayers in his municipality.

He said parents have been shocked in North Vancouver and elsewhere to learn their children will have to attend shift-classes this September.

"Never once, in all my years in school in Kelowna, did I have to attend a shift class . . . and I don't want my children to have either," he snapped.

No Plans to Close Major Forces Bases

OTTAWA (CP) — No major armed forces bases will be closed this year, Defence Minister Hellyer reported to the Commons Monday.

If and when decisions are made on closings, he added, the greatest possible advance warning will be given to those affected.

Mr. Hellyer made the statement in a written reply to a Commons question by Nicholas Mandziuk (PC — Marquette) who asked whether the government planned to close the training base at Rivers, Man.

The minister did not reply directly but said the department now is studying the positioning and grouping of activities and forces, including "amalgamation where practical," and that the study is expected to take considerable time.

While no major bases will be closed this year, he added, "this does not preclude the possibility of moving units or activities from one base to another."

SCHEDULE FOR HOUSE

Tentative scheduling of speakers in the legislature for Wednesday is: Resources Minister Ray Williston; Les Nimsick (NDP—Kootenay); L. A. Williams (L-Vancouver—Upper Howe Sound); Dr. Ray Parkinson (NDP—Vancouver-Burrard); H. J. Bruce (SC-Esquimalt, and Robert Williams (NDP—Vancouver East).

Teachers Drop Threat

ABBOTSFORD (CP) — District teachers voted Monday to abandon a work to rule campaign as a means of protesting working conditions. A spokesman for the Abbotsford District Teachers Association said they had planned to begin their work to rule Wednesday, but the school board offered to make certain changes in subsequent discussions.

LEGISLATURE ON THE AIR?

Vote in Moment, But First...

A freshman Liberal MLA Monday raised the ante for public exposure of legislative debates.

Barry Clark, a radio "hot-line" performer and North Vancouver councillor, urged:

The government to introduce a Hansard report of debates so that all news media would be able to publicize fully the political ideas of the day;

TECHNOLOGY The Speaker to permit radio tape-recording and televising of the debates as they occur so the public could hear and see their MLAs in action.

"The old objection to this suggestion is that the equipment necessary would tend to clutter and distract the members," he said.

"That may have been so many years ago but it is not

the case today. Modern technology has produced equipment which makes it possible for all these things to be done without the slightest interference with the proceedings of this legislature."

Mr. Clark said the recording and televising techniques

at the United Nations had proved this.

While pointing to a recent decision of the federal government to supply a copy of Hansard to all news outlets in the country, he was interrupted by Premier Bennett who snorted: "They've had chaos ever since."

A Time to Bridge the Gap?

NO LESS AN INTERNATIONAL expert than Mr. George F. Kennan, Kremlinologist and former American ambassador, believes that Russia and China are irretrievably split, that China's internal turmoil has set the country back "for years", and that China cannot become a world power until the 1980s.

Those are definite statements, given before the U.S. Senate foreign relations committee, and they should call for a new look at the relations of the West with Russia and with China. There should be here an opportunity for intelligent statesmanship to create a better East-West situation from the chaos in the Communist house, but it will take new understanding in Washington and a new willingness to work on a global rather than bloc basis.

Mr. Kennan's predictions may, of course, be wide of the mark. The earlier estimates of China's ability to produce a nuclear weapon and delivery missile had to be drastically revised in the light of Peking's bomb tests, and to predict what power position China may occupy a dozen years hence would seem to be a chancy venture. But at the same time Mr. Kennan wisely interprets the current condition of upheaval as an opportunity to improve East-West relations.

Russia has given some indication of wishing to strengthen its position against an antagonistic China by improving its contacts with the United States. The indications are subtle, but have been identified. And

out of the maelstrom of the Chinese anti-Mao rebellion may come an opportunity to show that the West is willing to regard the 700-million nation in a new light—a country with legitimate rights in the twentieth century and with need of help in achieving a stable place in the world society.

The Vietnam war emerges, in these considerations, as a major impediment to progress. Russia, to maintain its place in the Communist scheme of things, cannot appear to be soft in the face of what it regards as foreign attacks on a Communist land; nor can China contemplate an American foothold in southeast Asia as anything but intrusion by an enemy. Thus while the fighting continues, further advances toward better Western relations with either of the Communist giants are made much more difficult.

Mr. Kennan says it would be tragic if the United States failed to "recognize these hopeful elements . . . and should risk driving our differences with Communist powers to a violent and apocalyptic conclusion."

In this light the Vietnam struggle takes on much more than local importance. Maintained too long it could prove to be the factor which destroyed a chance for better relations with a Russia now slowly undergoing a liberalizing process—a chance for which the people of many countries have been awaiting for fifty years. That is a heavy responsibility for the White House to carry.

The Housing Dilemma

THE ONE-THIRD INCREASE IN federal funds for housing programs—up from about \$600 millions to \$800 millions—announced Monday by Finance Minister Sharp, won't go far to solve the housing shortage. The best hope is that it will be a useful stop-gap measure in a generally serious situation.

The nub of the problem is how much of the additional funds will be available for direct lending on housing as distinct from other parts of the government program which includes urban renewal, sewage and water services, and university residences. Mr. Sharp was unable to clarify this point. Even if the government were planning to pump as much as \$100 millions extra into direct mortgage loans this would provide for only about 7,000 housing unit starts—hardly enough to make a ripple in the shortage which last year saw Canada fall 40,000 units behind the number needed to provide for family increases and immigration.

What the government must hope is that declining interest rates will attract more money into private housing by making the National Housing Act rate of 7½ per cent more attractive to lenders. Mr. Sharp intimated this when he spoke of using the increased direct government lending in the early part of

this year. There are expectations that private money will become more plentiful by about mid-year.

There is no doubt the government is in a bind on housing. The need for monetary restraint last year had its heaviest impact—as it usually does—on the home-building industry. The social consequences of inadequate housing, therefore,

have had to be balanced against the economic consequences of inflationary pressures.

The government can hope, without being absolutely sure, that the inflationary pressures are easing off, but a too-rapid resumption of a house-building boom could be just the factor which would touch them off again. Economists have estimated that \$1 million in mortgage credit generates an additional \$700,000 in additional housing expenditure within six months and another \$2 millions worth of consumer-durable purchases and services within two years.

The pyramiding of expenditure in housing calls for caution, but the urgent demand for housing calls for the reverse. Canada cannot afford to have its international competitive position further eroded by inflation; but neither can it afford to have its citizens short of housing, for this in turn exerts an upward pressure on rents and prices, which leads to higher wage demands, as well as being politically unpopular.

Good Advice to Packagers

MISS ELEANOR ORDWAY, head of the federal food and drug directorate's consumer division, warns the Packaging Association of Canada that it had better not "let things get to the point where it may be necessary to correct a situation by new legislation—do it yourself."

The "things" to which she refers are aspects of the packaging industry which raise protests from consumers and contribute to a "suspicion that packages are not designed for" (the consumer's) benefit but solely for the benefit of the food processor and retailers."

The recent price spreads inquiry and other studies from time to time have raised the question of inaccurate labelling, confusing quantities and pricing, misleading advertising, and other matters, including

the high cost of some packages. A government survey in 1961 showed that 40 per cent of consumers objected to one factor or another in packaging.

Miss Ordway's advice to the industry is therefore pertinent at this time, for there is mounting public pressure on the packagers to do something about the problem, and on government to force the industry to act if reform is not voluntary.

As Miss Ordway says, the industry would benefit in public esteem if it did the job itself, and fall correspondingly if it had to be pushed into action by law. But the point is that consumers everywhere, under the pressure of rising prices, are no longer willing to cope with faulty, misleading or costly packaging. The next move, and soon, should be by the industry.

Leader Needed

Montreal La Devolp

Mr. Diefenbaker is a skilful tactician. The Conservative party does not especially need a tactician; but it does need a leader who knows how to give effect to the aspirations of his supporters and of the people in general . . .

The party has no choice. It must take advantage of its next convention to revise its goal and modify its philosophy. If party militants are to arrive at the convention with clear ideas, with concrete proposals, they must be given time to reflect, to hold preliminary meetings at which all these things will be discussed. It is not in the space of one or two months that valuable and serious work can be done in this regard.

DENNIS THE MENACE

Looking Back

From The Times of Jan. 31, 1907:

Speaking at Grand Forks, J. A. Macdonald, the Liberal leader, dealt with the question of the Liberal party's attitude to the Grand Trunk Pacific. With regard to pioneer roads of that kind and as far as the Liberal party was concerned its policy was "to encourage the opening up of unsettled districts by the construction of railroads, etc. In such circumstances the interests of British Columbia must be safeguarded and for any assistance rendered there must be an adequate quid pro quo."

Letters

In Bondage

Truly Mr. W. A. C. Bennett has been met with favor from the money-lenders because naturally the results of any venture—or bonds issued—have the Province of British Columbia as collateral, and her people are in bondage, for value received by way of financing or loans.—(Mrs.) Ellen Hart, 5669 Sooke.

Depreciation

Much is written, read and heard these days about the plight of the senior citizens who are living on a fixed income that diminishes more and more as their needs increase. To add salt to the wound, this writer discovered recently that the Dominion of Canada Life Annuity of \$100 a month guaranteed for 20 years that he paid \$18,800 cash for in 1952 at the age of 61, could be bought today—if he were the same age—for \$16,160, a matter of \$2,640 less—to say nothing about the fact that those dollars today are only worth about half their value when he was trying to accumulate them.

For those of us who tried for a lifetime to make provision for themselves in their senior years, this is a pretty bitter pill.—T. H. Davidson, 225 Gorge.

Too Many Generalities

Although I agree with some of the points Miss Beverley Taylor made in the article by Desmond Bill, I would like to take issue with some of the others.

In the first place, I feel she made too many sweeping generalities, using words like everyone, no-one, typical, etc. All single old women don't live uninteresting lives. To her, perhaps, but not to them. How far did she go out of her way to brighten up their so-called dreary lives?

Remember, she will probably be old someday. So many old people are a wealth of information and experience which can often be invaluable to us if we only take the time to listen.

I am 22 years old.—Junior Miss.

Social Change

Regarding the article you reprinted from the Globe and Mail on January 25 about the Company of Young Canadians, it seems that you missed the point. Your editorial introduction states that the company wants to work in "fields such as social welfare and rehabilitation."

The article points out that volunteers are attempting to find the sources of social problems. The article states "a term of years would be part of the peace treaty and should not be confused with the Gavin-Ridgway strategy for conducting the war from fortified enclaves. I have heard the idea described as 'a Guantanamo solution' (Guantanamo is a fortified place on the Cuban coast which the United States occupies). A Guantanamo solution might be part of the answer to the problem as it actually exists today."

along these lines, an eventual settlement might take the form of two provisionally separate Vietnams. It is not impossible to imagine that for a term of years both Vietnams would find it convenient to have a continuing U.S. military presence in some fortified enclave. It might help to stabilize the South Vietnamese government in the difficult period of reconstruction after this brutal and destructive war, and it might help the North Vietnamese government in following its nationalist desire for independence from China.

Continuing Presence

This continuing U.S. presence for a term of years would be part of the peace treaty and should not be confused with the Gavin-Ridgway strategy for conducting the war from fortified enclaves. I have heard the idea described as "a Guantanamo solution" (Guantanamo is a fortified place on the Cuban coast which the United States occupies). A Guantanamo solution might be part of the answer to the problem as it actually exists today.

For while I, for one, think we should never have committed ourselves to a land war on the Asian continent, we have done just that and we have done it on a very large scale. It will not be easy to end our immense entanglement, and if the war is to be ended by negotiating compromises, a Guantanamo arrangement might be one of them.

By TIM TRAYNOR

After the 'Severe Restraint' Ends?

With the worst of the wage-price freeze past, the question for Britain now is: What happens after the current period of "severe restraint" ends this summer? More particularly, what will happen to wages? The government has said there can never be a return to the old free-for-all in wage bargaining. Will it, then attempt to retain the power to ban wage increases—a power it took in October as an emergency measure? Or will it try to devise a less drastic system of income control?

For the labor unions, the answers are especially important because upon them depends the outcome of all current wage negotiations. Consequently, they have been doing their best to make the government spell out its policy. There is to be an important meeting of union

executives early in March, and spokesmen have said that if the government opts for a policy of voluntary incomes restraint the unions will continue to cooperate, but that if the government stays non-committal there will be an "explosion" of fear of further compulsion.

The government, while continuing to shun a firm commitment, has responded by soft-pedaling the possibility of compulsion. Although there are indications that some in Prime Minister Wilson's cabinet would like to retain the power to veto increases, at least as a reserve, there are also believed to be grave doubts that any such policy could be carried through in the face of resolute union opposition.

Veto May Lapse

It is, therefore, thought to be more likely that, for the time being, the government will allow its veto to lapse in August and fall back on its reserve power to enforce a four-months standstill on wage settlements. This power, approved by Parliament last July along with the wage-price freeze, but not enacted, could be used to ensure that there would not be a totally uncontrolled surge of wage increases in the wake of "severe restraint."

Though the unions also oppose this course, it is believed the majority would hesitate to revolt over it lest Mr. Wilson re-invoke the veto.

If things did work out this way, Mr. Wilson would be in a better position to mould a permanent incomes policy. He could get through the potentially embarrassing union and party conference season without having firmly committed himself one way or the other. Moreover, he will probably have before him the report of the royal commission on the trade unions, which is expected to recommend that the unions lose their exemption from suit for breach of contract. Faced with such a recommendation, the unions might well become more receptive to government proposals on incomes restraint.

Control Structure

What sort of incomes policy might emerge in the long run? A basic structure already exists in the present policy for both wage and price control. It provides for establishment of a yearly percentage norm for wage increases, corresponding to the estimated growth of the gross national product. Any proposed

increases exceeding the norm would only be allowed when an increase in productivity would be demonstrated or when the recipients clearly fell into the class of "lower-paid" workers.

Interpretation of these rules would be left to the Prices and Incomes Board set up last July. It is already the judge of productivity and low income when deciding what raises are to be permitted during the period of "severe restraint."

Union Role

Various ways of overcoming the problems involved in administering such a policy have been suggested, but most agree that the powerful union association, the Trades Union Congress, and its management counterpart, the Confederation of British Industry, must play a key role. If they could agree to set up joint machinery to supervise all negotiations and assume responsibility for enforcing the implementation of a jointly drafted policy, they could overcome the biggest problem in restraining income, namely, the need for direct government action.

There are indications that this is what the government ultimately hopes to achieve. The two organizations are already co-operating in reviewing wage agreements to see whether they meet the requirements of the government's prices and incomes policy and the TUC is trying, with some success, to strengthen its authority over its members. It is now being challenged by the government to assume its share of responsibility in ensuring that a TUC-run incomes policy is enforced.

Tax Penalty

If it agreed to do so the government could conceivably devise a role for itself which wouldn't require it to assume veto powers once again. A tax on violators of the policy is one means that has been suggested.

So far the TUC has flatly refused to go along with the game. But the government is believed to be planning to link its push for an incomes policy with social security adjustments aimed at the low-income groups, and this could help to soften up the unions. Combined with a strong royal commission report in September, this might pave the way for a compromise with the TUC, which would be a long step forward in laying the foundation of a stable incomes system.

Running Nicaragua 'A Private Affair'

By J. HALCRO FERGUSON

Once again the tree-shaded Spanish colonial streets of Managua, the capital of the Central American republic of Nicaragua, have been awakened from their customary torpor by the shouting of rioters and the rattle of gunfire. At least 26 people are reported to have been killed.

The reason for the outbreak was the same one which had motivated every similar explosion for over 30 years: the desire to get rid of a man called Somoza. But it has not always been the same Somoza; when one of the ruling family goes there is always another to take his place.

The Somoza dynasty started with a palace murder in 1934. On February 21 of that year General Augusto Cesar Sandino, a public figure best known for his consistent opposition to the occupation of his country by United States Marines from 1909 to 1933, dined with the then president Juan Bautista Sacasa. On leaving the general was murdered by men of the National Guard, a body trained by the U.S. Marines to keep order after their departure.

Justice Foiled

President Sacasa sought to have the murderers brought to justice but was foiled by his nephew, General Anastasio Somoza, known to his friends as "Tacho," who was head of the National Guard. Two years later Tacho persuaded his uncle to retire and had himself elected to the presidency, his only opponent being conveniently in exile.

Somoza remained in power for 20 years, amassing a large fortune and thousands of acres of property for himself and his family. On September 21, 1956, he was assassinated by a patriotic poet called Rigoberto Lopez Perez, who was promptly cut down by the National Guard. But Lopez Perez's sacrifice was in vain; the Somoza dynasty lived on.

Tacho's eldest son, Luis Somoza, stepped smartly into his father's presidential shoes, while the younger son, Anastasio Somoza Jr. ("Tachito") took over the National Guard.

In February, 1963, Luis allowed elections to be held, the two candidates being Dr. René Schick, of the Somoza's own Nationalist Liberal Party (PLN) and Dr. Fernando Aguero, standing for the only sizeable opposition party, the Traditional Conservatives, (PCT), a body not noticed for its reforming fervor.

At the last moment Dr. Aguero withdrew in protest at Luis Somoza's refusal to allow the elections to be supervised by the Organization of American States.

"The political organization of the state is a private affair

Women relatives, some of them weeping, stand outside the prison in Managua, Nicaragua, after mass arrests of students and workers last week for implication in the riots which left scores dead. Left background, a company of soldiers swings past the scene.

of the Nicaraguans," said Don Luis. Or, one might say, a private affair of the Somozas. Dr. Schick was duly elected president; Luis and Tachito remained in power. Last August, Dr. Schick died unexpectedly from complications following a heart attack on the eve of an official trip to Mexico. Vice-President Lorenzo Guerrero assumed the presidency; the Somoza brothers remained more in power than ever.

Next month elections are due again, and this time Tachito is standing as National Liberal candidate. It is against this family succession that last week's riots were directed. They started sedately enough with a protest rally by the Traditional Conservatives, but matters got out of hand, shooting began, and anti-government demonstrators invaded Managua's principal hotel and held North American guests to ransom.

Standard Claim

The Nicaraguan government claims that the demonstration was infiltrated and taken over by Communists. Such claims are common form among Latin-American dictators on such occasions, and are formulated with the object (usually achieved) of obtaining United States support. But in this case the allegations could well be true.

Nicaragua is one of the countries where Fidel Castro of Cuba has been active in stirring up internal dissension, particularly since it was openly used for the training of Cuban exiles for the abortive Bay of Pigs invasion of April 1961, and it was from Nicaraguan airfields that the invaders' inadequate air support came. Since May, 1963, there have been several guerrilla attempts to take over the country, all of them effectively stifled by the National

(London Observer Service)

What Hope Has the NDP Of Winning in Ontario?

By DOUGLAS FISHER and HARRY S. CROWE

(Mr. Crowe is associate professor of history at Atkinson College, York University. Mr. Fisher, a former NDP MP, lectures in Canadian government at Carleton University.)

Unless our eyes and ears totally deceive us the New Democratic Party in Ontario is growing from strength to strength. No doubt there are many explanations of this phenomenon. The strengthening of the party's base in locals of labor unions is certainly one of them; the developing realization of an increasingly informed public that there is nothing sinister about this, that the ideas and objectives of the average worker on a job are the ideas and objectives of the average man on the street, is no doubt another.

The fact that the Drew-Kennedy-Frost-Roberts Conservative tenure in office is now approaching the quarter-century mark unquestionably feeds the desire which is latent in all democratic people "to give the other fellow a try." The recent and apparently continuing decline of the Ontario Liberal Party means that "the other fellow" is the New Democratic Party.

Oppositions do not automatically become governments with the passage of time. No party has more reason to know the futility of that ancient aphorism than the New Democratic Party in the light of its experience in British Columbia, Manitoba and Ontario.

It takes more than merely being the opposition. In fact in Ontario today there are two oppositions — the nominal Liberal and the effective New Democratic opposition. An opposition party must become a credible alternative to the government to move the electorate to put it into office. Government has become too complex, too involved in the lives of everybody for them to trust a devil they don't know over a devil they know.

Not only has the New Democratic Party apparently broken through this psychological barrier to become looked upon as a credible alternative government, but it appears to have done this in the relatively brief time of about two years. Much of the credit for this achievement must go to its leader, Donald MacDonald.

The New Democratic leader's New Year's

message was quite typical of the kind of moderate, probing, restless if cautious leadership which he is giving his party. In it he wondered about "a new dimension to the challenge and opportunities which lie ahead of Ontario." He went on to say that "our province can play a key role in cementing a modern Canadian federation with the strength and resilience to see us through the next 100 years."

Mr. MacDonald said, "Here in Ontario, the job ahead is exhilarating and important. We must seek to build a society in which government truly represents the whole people, and responds to their needs. The mood of questioning and protest which underlay last year's general pattern of prosperity will only be dispelled by policies from Queen's Park which are at the same time creative and compassionate."

There are many other recent examples of this moderate and reflective MacDonald leadership. His response to wild tirades against the New Democrats which have disfigured recent Conservative Party literature has been almost academic. He refers to the coming provincial election and says that "it will provide a healthy confrontation between the social democratic reform policies of the New Democrats and the democratic conservatism of the Robarts government."

"Democratic conservatism" is not a vituperative label. It is a description which the Conservatives might well use themselves, as Mr. MacDonald's statement neatly poses the alternatives which will face the voter of Ontario in 1967.

If the Ontario election could be carried on in this manner, if the Conservatives could take the myriad of specific proposals which have emanated from the New Democrats — the proposal for a study of education like the Parent Commission in Quebec, the proposal for a prices review agency, a public review of rents, a provincial consumer's bureau, prohibition of trading stamps and so many more — and say what they think of them, then it would indeed be a memorable election.

Specific proposals for specific problems are the hallmark of the new leadership of the Canadian left. It made the discovery that you can have ideology without dogma. Donald MacDonald said recently: "The attempt to solve must precede the act of solving." This sounds to us much like Jefferson's reference in his first inaugural address to "the full tide of successful experiment."

Need Western Aid To Settle Refugees Of African Troubles

By ALFRED FRIENDLY
The Washington Post

GENEVA — "Western governments can't have it both ways. If they insist that the underdeveloped countries must maintain human rights, including the right of asylum, they can't refuse to help them cope with the refugees they accept."

The statement is that of Prince Sadruddin Aga Khan, United Nations high commissioner for refugees. His reference is to the world's newest, most formidable and least recognized refugee problem, that of Africa. It is faced with handling the staggering total of 700,000 people who have fled from their home countries.

Prince Sadruddin, 33, an intense, handsome Harvard graduate, has wrestled in his first year in office with a refugee problem vastly different from the conventional post-

Second World War picture of a few thousand politically oppressed Central Europeans seeking asylum in the West.

To be sure, there are still about 10,000 escapees a year going to Western Europe. But almost all of them find quick succor, ready acceptance and free transportation to waiting jobs in manpower-hungry countries. Their plight is effectively dealt with by the Intergovernmental Committee for European Migration.

The dilemma in Africa arises from the instability of the governments of former colonial countries, still torn with tribal and ethnic hostility and often irresponsible political adventurism, and from the continuing liberation struggle in the Portuguese colonies.

War and Politics

Civil wars have sent Congolese swarming into Uganda, Burundi and Tanzania for refuge. The immemorial enmity between Watutsi and Bahutu have sent them to the Congo or back and forth between Rwanda and Burundi, according to the fortunes of war and politics.

A quarter of a million Angolans have fled over the Congo border; 15,000 Mozambiques and 13,000 Rwandans have run to Tanzania; 25,000 Sudanese have surged into the Central African Republic.

Except to evoke compassion for the human tragedies those figures represent, need they concern the developed nations of the West? The high commissioner gives a sharp answer, almost surely born of the specter of Palestine.

The thousands of Arabs who fled Israel in 1948 constitute the most dangerous explosive

PRINCE SADRUDIN
African dilemma

desist refugees is to encourage further wars and the production of more refugees.

The job of the UN high commissioner for refugees is to get them settled and self-supporting and tide them over during the process. For its work in Africa, the agency had the preposterously low budget of about \$2 million in 1966. It hopes for a bit more in 1967.

Prince Sadruddin, son of the late Aga Khan and uncle of the present one, argues earnestly that in perhaps as little as two years the refugees can become great assets to the accepting countries by helping them increase production. The danger is in the early period when immediate needs must be met and the means of the host countries are close to non-existent.

OAS Summit Meet May Be Called Off

By JOHN M. GOSKO

SANTIAGO, Chile — The Chilean Senate's sabotage of President Eduardo Frei Montalva's United States visit may also have put an end to hopes of holding a proposed "summit" meeting of Western Hemisphere chiefs of state in April.

A high official of the Frei government has hinted that current political conditions here might make it extremely difficult for Frei to seek the congressional approval necessary for him to leave Chile within the next few weeks.

On the eve of Frei's departure on a U.S. state visit, his opposition teamed up in the Senate to deny the permission to leave the country required by Chilean law. For this reason, there has been considerable speculation about whether Frei would be willing to risk a new rebuff over the question of attending the presidents' meeting.

(The Washington Post)

Speculate on whether Frei would want to postpone the conference until after new Chilean elections.

Observers think his first preference would be to wait until new elections have given him his hoped-for majority and allow him to appear at Punta Del Este in the wake of a personal triumph that would be sure to increase his influence there.

The big question, of course, is whether Washington and the other countries involved would wait that long. Increasingly, there is impatient talk in hemisphere circles about getting the conference moving or forgetting about it. And Frei's unexpected troubles thus could become the catalyst that forces a decision one way or the other.

(The Washington Post)

N.B.'s Robichaud Hits At Forces of Reaction

By PETER C. NEWMAN

ST. JOHN, N.B. — The political process in contemporary society often turns on a contest for power between the concerned and the comfortable.

Seldom has this been more true than it is today in New Brunswick where Louis

Newman, the son of a South Shore postmaster, is challenging the forces of reaction to fashion a new, egalitarian society for the province's 600,000 citizens.

Robichaud hardly looks or talks like a reformer. When he speaks, he waves his arms with all the assurance of a slicing-machine demonstrator at a country fair, and his diamond cufflinks glitter. His eyes glint too, as he expounds the details of his "program for equal opportunity," which he vows will transform the province.

"We can't sit around waiting for a God-given miracle to end the inequalities which are contributing to the waste of our most treasured possession — our people," he told me when I met him at his ultra-modern legislative office.

Equal Chance

"What we're trying to build here is a society where every child will have an equal opportunity to achieve the goals he sets for his life. A society in which individual success is possible, but not at the expense of another man's poverty."

Stocky, with heavy-lidded eyes and the look of a politician responsive to the play of forces around him, the 41-year-old premier is putting his province through revolution which in its way is more fundamental than anything that's happened in Quebec since 1960. Robichaud is no grandiloquent theorist. Just a gut politician who grew up the tough way with ten brothers and sisters and knew exactly how agonizing it is to break through the cycle of tradition to get an education and move

Principles

from the program, Robichaud's reforms have been portrayed as "robbing Peter to pay Pierre."

But the harshest indirect objections are rumored to be coming from industrialist K. C. Irving, because many of the special tax deals his companies have with municipalities will be wiped out by the new uniform assessment regulations.

Not surprisingly, Robichaud supports the principle of strong central government (47 per cent of New Brunswick's revenues come from Ottawa) but unlike some Maritimers, he doesn't resent Upper Canada.

Pearson Fair

"How," he asks, "can you blame anybody for showing initiative and achievement? I felt we were being discriminated against when Diefenbaker was in power, but now it's just the opposite. Mr. Pearson is fair — at times he's too fair, just not rough enough. He's developed the art of compromise to such a degree that he might be referred to as the professional compromiser."

His only grievance against Ottawa at the moment involves the referral of the offshore mineral rights issue to the Supreme Court.

"This should have been negotiated on a political basis," he says.

He advocates scrapping the British North America Act ("The constitution of 1867 wasn't bad for the 19th century, but we need one adapted to the needs of the 21st century") and a redistribution of powers that would give provinces even more powerful mandates.

"Canada to me," he concluded in a rare burst of eloquence, "is not just a customs union or a centralized system for delivering mail. Canada means the possibility of a certain kind of society that I desire for my children, and their children after them."

Radical Change

So deep lie the discontents of New Brunswick society that they can barely be touched by traditional government hands.

Instead, Robichaud is pioneering a play, which, if it can weather the fierce opposition if it has aroused, will radically re-arrange the economic pattern of New Brunswick life.

LOUIS ROBICHAUD—He Grew Up the Tough Way

Based on a 1964 royal commission report, the program is designed to do away with the province's obsolete administrative structure, ensuring that even the poorest communities get basic minimum services without the imposition of a disproportionate local tax burden. On January 1, 1967, the provincial government accepted responsibility for the administration and full cost of education, health, welfare, justice, and assessment and tax collection in the province.

Property, wild-lands, inventory and turnover taxes have been abolished, while the sales tax was boosted to 6 per cent. Municipal governments have been reduced to caring only for the physical aspects of property and the once-powerful county councils will disappear altogether.

Most important of all, a ten-year \$100 million program has been launched to reform the province's primitive education system. In King's County, for example, which now has 54 one-room schools, primary and secondary education will be centralized in one modern school building. The 422 school districts in the province will be consolidated into 33 school divisions.

His only grievance against Ottawa at the moment involves the referral of the offshore mineral rights issue to the Supreme Court.

"This should have been negotiated on a political basis," he says.

He advocates scrapping the British North America Act ("The constitution of 1867 wasn't bad for the 19th century, but we need one adapted to the needs of the 21st century") and a redistribution of powers that would give provinces even more powerful mandates.

"Canada to me," he concluded in a rare burst of eloquence, "is not just a customs union or a centralized system for delivering mail

Customer Runs Obstacle Course

By AB KENT
Business Editor

Sometimes the innocent get knocked about in the high pressure of today's business.

In its zeal to demonstrate how impossibly efficient it can be, a large downtown Victoria department store Monday alienated a responsible citizen.

The man, accustomed to paying cash whenever he can, found himself short. All he wanted to do was make a purchase and pay by cheque.

To get the \$10 he ran a dog-legged obstacle course that included:

- Being refused the routine courtesy of paying the sales clerk to get the goods he bought.
- Waiting in line for his turn at the cashier's wicket three flights up.
- Being referred to another lineup behind four persons doing credit business and (or) socializing with the clerk.
- Giving up cheque and personal identification while a supervisor, hidden from view, scrutinized, compared and finally rejected the cheque.

By this time the customer figured he might never be allowed to do business with the ABC Co. Dazed, he came away from the cashier's department with a small plus, the knowledge of a new, though ridiculous, word — "stale-dated."

The cheque, he was told, was "stale-dated."

Presumably that meant it was not acceptable because it had been made out some time previously.

The bank on which the cheque was drawn may be able to help, the lady said. Dubiously.

He walked three blocks to the bank, three blocks in which he debated whether he should bother going back.

With the calm courtesy shown him at the bank — the girl smiled and asked only for identification — and with crisp, new bills including the first centennial dollar he had ever seen, the man's umbrage lifted

and he walked the three blocks back to the columned sanctity of the ABC Co. and paid for his parcel.

But he harbors a dark thought in a corner of his heart, a thought that, no matter how much historic prestige the ABC Co. may have, will never be erased.

How many more share his resentment?

There was a time when a cheque was a person's bond, an instrument of his integrity, accepted for what it was, especially from a person whose reputation in the community has never been questioned.

It must have been long ago.

The 15 per cent loss of production automobile manufacturers have suffered with cutbacks since the new model year started last October will be made up this year.

Neil D. Gaskin, vice-president of sales for American Motors (Canada) Ltd. at Brampton, said here Monday that total production would be about equal to the 1966 total.

Easing credit restrictions will help sales, hence production, he said.

But with the rise will come price increases, too, he said.

Mr. Gaskin predicted that the price of European-made cars in Canada will go up \$100 in the current year.

Domestic car prices will increase more slowly he thought due to the rationalization process resulting from the Canadian U.S. auto pact. Whatever U.S. price gains are made will be reflected to a lesser degree in this country.

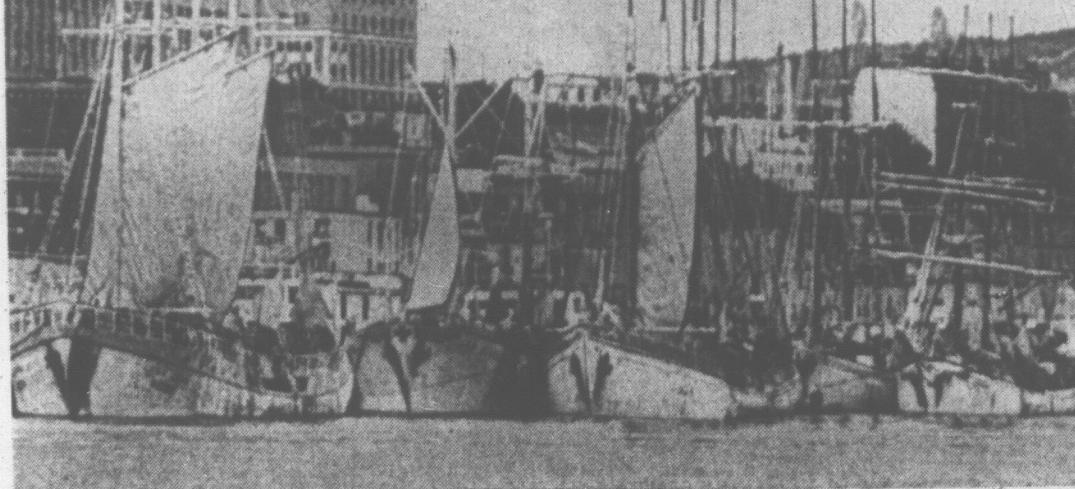

His own firm will sell about 30,000 units in Canada this year, Mr. Gaskin predicted.

Year-end bank figures show nearly \$5 billion worth of withdrawals made by Victorians in 1966.

Debits reported by the Canadian Bankers' Association for the 12 months came to \$4,905 million, a staggering amount if considered as a cumulative total. But of course it represents money in circulation.

December's total was \$495 million.

The previous annual record was achieved in 1965 with \$4,324 billion in debits.

WORLD'S last commercial sailing fleet appears to be on the way out. The Portuguese White Fleet, which has been fishing the Grand Banks and calling

at St. John's, Newfoundland, since 1501, is shrinking and is expected to disappear within five years. (CP Photo.)

France Abolishes Curbs On Monetary Exchange

PARIS (UPI)—France today made its bid for financial leadership in Europe by abolishing monetary exchange controls and freeing the gold market.

Backed by \$5.7 billion worth of

gold reserves, the former "sick man of Europe" made a giant step towards the European Common Market goal of making all currencies among the six members freely convertible.

It means that for the first time in 30 years Frenchmen will be able, beginning today, to take in and out of France as much gold, currency and equities as they wish.

The objective of this far-reaching measure is to re-establish Paris as a major financial centre and making the small local gold market bigger.

FRANCE RECOVERS

The French government has been able to institute this financial liberalization after watching the steady recovery of the franc since President Charles de Gaulle came to power in 1958.

In addition the French can now afford to be liberal since the franc is now backed by \$5.7 billion in gold in the vaults of the Bank of France.

The net result is that:

• Frenchmen will now be able to hold a foreign bank account without government authorization.

• Frenchmen will be able to settle foreign bills with a cheque drawn on a French bank.

Frenchmen will not be from the only ones to benefit from the financial liberalization.

Foreigners will now be free to acquire up to 20 per cent of the capital of a French firm whose shares are quoted on the stock exchange.

\$ EXCHANGE

VICTORIA—Bankers buying cheques at 1/2% premium, note 3% premium and buying silver at 5%. Selling cheques at 5% and gold at 5% premium.

MONTRÉAL—CP—The United States dollar in terms of Canadian funds was up 1% to 82.61.

NEW YORK (CP)—Canadian dollar up 1/2% at 22.45/44 in terms of U.S. funds. Pound sterling up 1/16 at \$2.79 7/16.

Development Corp. Urged for Province

A New Democrat MLA Monday called for the establishment of a "crown corporation for economic development" and an economic planning council to Canadianize provincial development.

F. J. Vulliamy (NDP—Burnaby-Willowood) in his maiden speech in the legislature said the province "needs a vehicle to channel the savings of our people into provincial development."

"We need a crown corporation for economic development in order to assist in developing primary industry and encourage the growth of secondary industry," he said.

"And of course we would then need an economic planning council to develop our province along ordinary lines rather than leaving it to the accidents of private enterprise."

The development corporation was needed, he said, because "our people are afraid to trust their savings to finance companies, mortgage corporations and other institutions of that type where there is a possibility they may see them disappear."

And the Bank of British Columbia would not do.

"What assurance do we have that once it is successfully established it will not be taken over by one of the national

banks with substantial capital gains to its shareholders," he said.

He blasted the Social Credit government for ignoring the dictates of social justice.

"For too long we have suffered from the Chamber of Commerce mentality which favors short-term material gain over all ethical considerations," he said.

Opposition spokesman said the move didn't go far enough to meet what they termed a national crisis.

Said NDP Leader Douglas:

"The proposal . . . is about

adequate to meet a housing crisis as it would be to feed a peanut to an elephant in hope of assuaging its hunger."

Labor Minister Nicholson announced in the Commons a specific two-month spring program of direct government loans to builders for the construction of 20,000 housing units without the usual presale requirement.

It would be limited to 16,000 single-family homes and 4,000 rental units with loans to be granted between April 1 and May 31.

Similar programs were adopted to spur winter home building during the last two years. They involved 34,000 units and \$461,000,000 in 1965; 37,000 units and \$544,000,000 in 1966.

OPPOSITION CRITICAL

Opposition spokesman said the move didn't go far enough to meet what they termed a national crisis.

Said NDP Leader Douglas:

"The proposal . . . is about

VSE REPORTS INCREASE IN TRADING

VANCOUVER (CP)—Volume of industrial trading on the Vancouver Stock Exchange is still far short of potential, president J. A. Van Luyen said in his annual report on Monday.

During 1966, 4,420,000 industrial shares with a total value of \$51,900,000 were traded. The 1965 figures were 3,960,000 shares and \$51,300,000.

"Once again I take the opportunity of urging members to re-examine their industrial trading policy with a view to assisting themselves through the medium of their own stock exchange," said Mr. Van Luyen.

GARY PLAYER'S GOLF CLASS:

Boost at Soccer Gates Part of Victory Legacy

By JOHN FARROW

LONDON (AP) — A million soccer fans turned out to watch 32 teams play in the third round of the English Cup Saturday, so great is the interest England's victory in the World Cup last summer has generated for the game here in its island home.

ETHNIC ORIGIN of this dance by Les Feux-follets, is the land of dykes and windmills. It is one of many colorful scenes in "The Canadian Mosaic," the program of Canadian folklore which the dancing-singing troupe will perform, at McPherson Playhouse

ST. JOHN CADETS

Brighter Uniforms Key to Expansion?

NIGHT CLASSES

Threads Go Back To School

Many of Victoria's senior citizens want to go back to school.

And the Silver Threads Centre at Centennial Square is doing something about it.

We have asked the school board if it will supply qualified instructors for a series of night classes at the centre," executive director Mrs. Catherine Horne said today.

The idea is hold classes in various subjects for groups of eight or 10 members between 7 p.m. and 9 p.m. several nights a week.

The board is anxious to cooperate and we are now ascertaining how many members would attend the classes."

LITERATURE

Mrs. Horne said a number of members have asked for instruction in music, commercial French, English literature, journalism, millinery and oil painting.

But they don't want to compete with younger students attending the regular night classes offered by the school board's adult education division.

Millinery and oil painting are already being taught at the daily arts and handicraft classes held at the Silver Threads from December to April. More than 350 have already enrolled for the classes this year.

"They are overcrowded and there is a waiting list," Mrs. Horne said. "We would therefore like to enrol the overflow in the proposed night classes."

The Silver Threads Centre has enrolled 2,264 members, 65 years and over, since registration opened Jan. 2. By the end of 1966, the centre had 4,700 members.

The pace of enrolment for 1967 indicates we shall soon exceed the 1966 figure before long," Mrs. Horne said.

Foster Parents Sought

Four mature and patient adults are needed immediately to become foster parents to children over eight years old.

A number of homes for younger children, especially for babies, are also needed by the Family and Children's Service. Applications from families whose youngsters are in their late teens or married are encouraged.

Prospective foster parents are invited to a meeting Thursday at 8 p.m. at Spencerhouse, 1951 Cook St. Four foster parents who have already cared for babies and school-aged children will discuss their experiences.

Night Courses Planned In Selling

New night courses in personnel management, retail selling and business law are being offered by the Institute of Adult Studies.

The courses, which will use the case-book approach, were developed in co-operation with the federal manpower department.

The courses are designed to assist small businessmen. The course in management will be given by Waldo Skillings, Jr., holder of a master's degree in business administration. David Sawyer, a city businessman, will be the lecturer on retailing. The business law course will be given by E. O. Rogers, a Duncan lawyer.

School Board 'Delay' Scored By Esquimalt

Esquimalt council Monday night took another swipe at Greater Victoria School Board for its alleged neglect of the grounds of an Esquimalt school.

Council wants a "hurry-up" on the job of levelling and seeding grounds around Esquimalt Sr. Secondary. A request for action was sent to school trustees after discussion at the last council meeting.

"It's seven years since that school has been built and the ground still has not been leveled," said Coun. Walter Lock Monday.

"We feel school board representatives have not been around to see the mess there recently."

Council agreed the school grounds, where they hope a track will eventually be built, are at present an "eyesore."

A clean-up program should get priority from the school board, council agreed. A meeting with board representative is planned.

'Quake in Caucasus

MOSCOW (Reuters) — The Kingston Trio, whose rhythmic folk songs started a guitar-twanging craze on college campuses, is giving up the act that has netted millions.

Bob Shane, Nick Reynolds and John Stewart announced Monday they will disband after June 1, even though the trio can still earn \$750,000 annually.

The reason they give: The public won't let them sing anything but Tom Dooley and other standard folk tunes.

PRICE TAG \$55,000

Crystal Garden Heat Supported

Victoria's recreation committee has agreed to spend up to \$55,000 to keep the heat on at Crystal Garden.

The decision still requires ratification from city council.

A consulting engineer told the recreation committee Monday that with a May deadline for the CPR steam cut-off for the

Crystal, action would have to be taken quickly.

He recommended the two boilers be installed at a cost of \$42,500 to keep the swimming pool and other facilities open.

A further \$15,000 will be required later to improve the ventilation system and replace worn-out pipes.

NEW SYSTEM

In addition to the \$42,500 for the installation of the boilers and general changes in the building, the engineer said two fans would be required to make the new system effective.

City engineer James Garnett said that with the required fans the total price of keeping the Crystal open with a heated pool would be around \$50,000.

Committee member Michael Griffin suggested that \$55,000 be earmarked for the project.

SPECIFIC PRICE

"It seems that every time we say we will do things for a specific price — when we are not quite sure what that price will be — we have to come back asking for more money," he said.

Ridiculous' Strike Vote Rescinded

VANCOUVER (CP)—The University of British Columbia's student council Monday rescinded its pledge to support a strike threatened by students.

The council endorsed the strike proposal at a meeting last week as a means of protest if the grants didn't match the \$66,000,000 figure recommended by UBC President John B. Macdonald.

Student councillors had promised to lead the university's 17,300 students in a long-term boycott of classes if a referendum Feb. 14 favored the strike by a two-thirds majority.

The decision followed criticism by Dr. Macdonald. He described the strike as irresponsible.

First vice-president Charles Boyland of the student council, who made the original strike motion, apologized for what he called "the most ridiculous motion made in this chamber this year."

The hit of the evening, which received seven curtain calls from the crowd of 1,900, the Capital Theatre has a capacity of 1,980—was Solitaire.

'Spring Gold in Bloom! He Cried All A-Glitter'

By GLEN ALLEN

There it is, in the angle of two rocks, under the rain, by a pond, in the sound of the highway, tiny and bright as the spring sun.

"Spring gold," shouts the oldest, brightest face in the crowd as if it were star dust he's found.

"Spring gold in bloom," shouts Skipper King, finder of flowers, inspector of weathers, known of all things.

Any Saturday, sure as rain, sure as the robins and spring, Skipper King is finding some flower, greeting it like an old friend, showing its face and its name to young people who are coming to love nature as much as he does.

Part Socrates, part Thoreau and part Pied Piper, Skipper believes nothing that grows or breathes is without importance.

The 20 junior members of the Victoria Natural History Society who sloped around Thetis Lake Park after him in the rain Saturday, even the fat newspapermen and brave mothers and fathers, their hearts murmuring, were

excited when Skipper King found the Spring Gold. It's his way.

Seventy-six years old and with the style of a Gordie Howe, Skipper King has been shepherding boys and girls around southern Island parks since he retired 11 years ago.

"I'm standing over wild tobacco," he says.

"Try smoking it and you'll see why it's wild," he says.

"First puff blows off your ears and the second, your head."

All year long at places like Thetis Lake, Mount Douglas, Witty's Lagoon and Goldstream Skipper teaches young people "what a half-baked naturalist" has learned in a lifetime.

To some of them some day it will be worth as much as the gold in that sprig of Spring Gold.

Because when some day, they find they can't roll back the years and they can't, after all, go home again, they will remember Skipper King and what they found one day in the angle of two rocks under the rain.

Like this:

"We've got something here," he says to a ragged file of children behind him on the trail. "Something we missed."

"What is it, Ronnie?"

"Honeysuckle," says Ronnie.

"Right, but what kind?"

Ronnie doesn't know, but he learns.

TELLING NATURE'S SECRETS
every Saturday for 11 years, Free-man "Skipper" King has interested thousands of Greater Victoria young people in everything from trees to

moss, from birds to bears. At 76, Skipper has energy of Himalayan conqueror, outclimbs and outruns most indefatigable of youngsters. (Photo by Glen Allen.)

Night Run Asked For Freight

An interior MLA went to bat for Vancouver Islanders in the legislature Monday.

William Hartley (NDP)

Yale-Lillooet urged the B.C.

Ferry Authority to start a night

run if necessary in order to

provide a mainland-island con-

nection for drop trailer traffic.

"There has been much talk of

the B.C. ferries . . . discontin-

ting the carrying of freight

trailers and turning this busi-

ness over to the CPR," he said

in the throne speech debate.

"I would like to remind the

government that CPR had this

business at one time but they

did not look after it.

HANG ON

"Now our B.C. ferries have

this business and I suggest we

hang on to it. Instead of

curtailing our service, I suggest

that special night runs be put in

to handle freight — that is,

regular runs after 11 p.m.

"If there is money in this for

the CPR then it should be

possible for our ferry system to

give even better service and

still make money."

Impaired Driver Jailed 21 Days

Louis Planes, 39, of Milnes Landing, was jailed for 21 days Monday when convicted for the second time in 15 months of impaired driving.

The accused's car weaved over the centre line four times within a mile when followed by police on the Sooke Road Jan. 20, court was told.

Planes, who pleaded guilty, was convicted of the same offence in October, 1965. His driving licence was suspended.

Minor Had Liquor

James Weir, 19, of HMCs Qu'Appelle, was fined \$35 in circuit court Monday when he pleaded guilty to being a minor in possession of liquor.

He admitted ownership of eight bottles of beer police found in his car when he checked it Jan. 14 in Courtenay.

LADYSMITH — Opposing educational interests will clash head-on tonight at a meeting of District 65 School Board.

A majority of the school trustees are supporting submission of a \$1,000,000 referendum which will consolidate senior secondary students at Ladysmith.

Trustee Cyril White, Cheemainus, will be voicing the strenuous opposition of Cheemainus residents.

DEFEATED

When the consolidation issue was part of a composite referendum in November, 1965, it was overwhelmingly defeated by both Ladysmith and Cheemainus.

He will also ask the board to seek stopgap senior secondary schooling at either Nanaimo or Cowichan district schools on a fee-paying basis.

LADYSMITH — L.A.D.Y.S.M.I.T.H. dogs are having their day.

Monday evening Mayor Kay Grousel admitted: "Our year-old dog bylaw is useless unless we have a pound or a means of arresting stray dogs."

"People have called our bluff by buying licence tags but not putting them on their dogs."

Council reluctantly accepted the resignation of the commissioners appointed a year ago to oversee the bylaw.

TOO COSTLY

Mayor Grousel said the council last year did not pursue further the question of a pound because it involved building, vehicle and a dog-catcher.

She reminded council Mother Cecilia of the Good Shepherd Shelter at Mill Bay last year offered to take Ladysmith's stray dogs and provide a vehicle one day a week to round them up.

Mayor Grousel said: "People would not be so casual about letting their dogs run at large if it cost them a trip to Mill Bay to redeem them."

"A 20-mile trip might even make them consider giving up having a dog."

"The problem at the moment is you can't penalize an unlicensed dog."

FEW COMPLAIN

James Runciman, clerk, said there are few residents' complaints at present whereas this

CENTRAL, NORTH SAANICH

Land Purchase Speed-Up Urged for Water Pipes

STORMS SLOW VOYAGE OF LONE YACHTSMAN

SYDNEY, Australia (Reuters) — Sir Francis Chichester faced gale-force winds and wild seas today as he made slow progress on his lone voyage toward New Zealand.

The Sydney Sun reported that the 65-year-old British yachtsman had radioed back saying he was about 250 miles southeast of here, his departure point Sunday.

His ketch Gipsy Moth IV was making barely four knots, under greatly reduced canvas because of the rough weather and 50-mile-an-hour winds.

Chichester, knighted on the eve of his departure on the second half of his single-handed around-the-world trip, hopes to reach England in about 110 days by way of the hazardous Cape Horn.

Latin Working On Nuclear Pact

MEXICO CITY (AP)—Representatives from 21 American countries begin meeting in Mexico City tonight for final work on a treaty to create a nuclear-free zone in Latin America.

It will be the fourth session of the preparatory committee for the de-nuclearization of Latin America, headed by Alfonso Garcia Robles of Mexico. He hopes the treaty will be signed at the end of the session.

Representatives of all countries in the hemisphere except

Thief Waits In Jail For Sentence

An Alberta man who stole about \$250 worth of goods from a fishboat Saturday night will wait a week in jail to be sentenced.

Melvin Kneeland of Camrose, Alta., was on his way home when arrested at the city bus depot Sunday, central court was told Monday.

Police who searched him found \$40 in his sock, and a watch, radio and a toaster in his luggage.

Kneeland admitted taking these from skipper John Duggan after the two had gone aboard the True Blue for a few drinks Saturday night and Duggan had fallen asleep.

Water problems in Central and North Saanich could be solved within the next two or three years.

Ronald Upward, commissioner for the Greater Victoria Water District, asked the water board Monday to approve a \$15,000 expenditure in 1967 for the acquisition of land to provide a right-of-way for a pipeline to Central Saanich.

Reeve Hugh Curtis asked the expenditure be reviewed because "there is considerable urgency in this matter."

Mr. Upward said that under the present land acquisition program it would be between four and five years "and possibly eight" before enough land was purchased to provide the right-of-way for the line.

Reeve Curtis said he would like to see the right-of-way program proceed as quickly as possible even if it meant putting more money in the land-acquisition fund.

FASTER GEAR
Mr. Upward said it would be possible to move the program into a faster gear if the board was prepared to earmark extra funds.

Present plans call for the steady purchase of property to provide the right-of-way with the target date for the laying of a 36-inch pipe as far as Central Saanich and a smaller pipe into North Saanich four to five years away.

NEXT MEETING
The matter will be discussed in detail at the next board meeting in February.

Total budget for the water district for 1967 has been established at \$970,500.

Revenues to meet that total will be derived from: rentals and discounts, \$2,000; interest on investments, \$110,000; special contracts, \$12,000, and outside water distribution, water sales (to areas other than the core municipalities) \$260,000 plus the \$586,500 to be paid by the Greater Victoria municipalities.

Prior to presentation of the budget Mayor Hugh Stehen was elected chairman of the board for 1967.

Slide Kills Climbers
PRAGUE (Reuters) — Seven Czechoslovak climbers, including one woman, were killed in an avalanche in the Tatra Mountains Monday, the official news agency Ceteka reported today.

Yugoslav Plot May Involve Hundreds

TORONTO (CP)—Police said Monday night they believe an international terrorist group in the United States met to plan the six simultaneous bombings Sunday of Yugoslav diplomatic missions in Canada and the U.S. mission said today.

A spokesman said the plot may involve hundreds of persons with a powerful committee at the head.

In each city—Toronto, Ottawa, New York, Washington, Chicago and San Francisco—the bombs were placed outside the embassies or consulates. Only buildings and windows were damaged.

Police said the bombs could have been placed inside the buildings causing many deaths. The bombs may have been placed outside to appease members of the conspiracy who don't believe in murder, a spokesman said.

The FEI and RCMP are cooperating with Toronto and Ottawa police in their investigation.

In Toronto, police checked photographs of demonstrations in front of the Yugoslav consulate over the last two years looking for a lead. Individuals in the photographs are being investigated.

Police said extensive international travelling and many long-distance telephone calls were made to co-ordinate the bombings. The immigration department has been put on the alert to check suspicious persons crossing the border.

Suggestions that a bomb hurled at the Toronto consulate came from a passing car were strengthened Monday when Richard Bain, 24, a student at the University of Toronto, reported he had seen a car drive past the building shortly before the 4 a.m. explosion.

Earlier, speaking at the annual meeting of the St. Paul's Conservative Association, Mr. Camp said that by 1970, if the voting age were lowered to 18, there would be 3,000,000 new young voters in Canada.

'ACTED IN DESPERATION'

Death Row Escape Bid Foiled

SAN QUENTIN, Calif. (UPI)

A desperate bid by four condemned murderers — two of them police killers — to escape death row and quickly placed the convicts in isolation cells.

Officer of the day Walter Luster described the bid for freedom as "almost impossible" and noted there never had been a successful escape from death row. Luster said the inmates obviously acted in "desperation."

California's last execution was in 1963 but prison officials reported most of the 62 death row inmates had abandoned hope for executive clemency since the election of Gov. Ronald Reagan. Reagan made it clear during his campaign that he supported capital punishment.

Besides hacksaw blades, the guards discovered the convicts had woven two 100-foot-long ropes from torn sheets.

All had appeals before the courts and were not under threat of immediate execution.

SHOOTINGS IN BERLIN PROTESTED

BERLIN (Reuter) — The United States has protested strongly to the Soviet Union over shooting incidents here last week in which East German border guards killed at least three persons, the U.S. mission said today.

U.S. Ambassador George McGhee described the incidents as senseless and brutal shootings which were an affront to humanity.

He asked the Soviet Ambassador in East Berlin Pyotr Abrasimov, to use his influence with the East Germans to the utmost to ensure that the shootings stopped.

Applications Pouring In

Members of Indian bands in various parts of the province have applied for the Mungo Martin Memorial Trust scholarships. Gerald S. Andrews, chairman of the trustee board, reported today.

The scholarship was set up last month after the B.C. Indian Arts and Welfare Society of Victoria raised \$6,000 by public subscription.

Grants of between \$50 and \$300 annually are offered to Indians seeking education, vocational guidance and the opportunity to improve their skill in arts and crafts.

"We are still receiving donations to the fund," Mr. Andrews said. "Yesterday we received a surprise donation of \$10 from a former B.C. resident now living in Florida.

"As the fund grows, we shall be able to increase the scholarship awards."

The Mungo Martin Memorial Trust scholarship is named after Chief Mungo Martin, famed for his Indian carving, who died here on Aug. 16, 1962, at the age of 83.

SUBVERSIVE'

Chaos Closes Madrid College

By HAROLD K. MILES

MADRID (AP)—Educational authorities today closed Madrid University, Spain's largest institution of learning, after two days of battling between students and security police.

The university board of governors ordered all schools of the university, which has a total enrollment of nearly 25,000, closed for three days. It ordered the schools of political, economic, and commercial sciences closed indefinitely, saying they were centers of subversive activity.

Police and students "battled" with stones and clubs on the university's campus Monday afternoon after the police halted about 700 students attempting to march to the rector's office to demand release of classmate seized after a similar skirmish Friday.

INJURED

At least 50 students and police were injured, and at least one student and one police lieutenant were taken to hospital. Police arrested more than 30 of the students.

About 200 students again tangled with police near Madrid.

University's campus today, but the clashes jacked Monday's violence. The students ran through the streets shouting "guns no, democracy yes," and "dictatorship no."

The 15,000 students of Barcelona University, second only to Madrid University in size, voted today to strike for two days beginning Wednesday in support of their Madrid colleagues.

The clash Friday was triggered by use of police force to smash workers' demonstrations against rising living costs.

When police stopped the march Monday, the students pelted the club-swinging police with rocks. Police also clubbed three foreign newspapermen. Joust de Ruiter, a Dutch correspondent for Amsterdam's de Telegraaf, and Andrew Karnowski, British correspondent for Reuters, escaped. Aldo Trippini, manager of the United Press International office in Spain, was packed off in a bus with a group of students and detained about 15 hours.

Strikes and labor demonstrations erupted in other parts of Spain.

Murder Charge Laid As Two Drivers Shot

SIMMERS, B.C. (CP) A 19, by bullets from a small calibre gun, police said.

RCMP spokesmen at Kamloops and Simmers were unable to say when Myers will appear in court.

Ski Instructor Killed

BANFF (CP) — Fritz Junginger, 26, an instructor who joined a Lake Louise ski school only three weeks ago, was killed Monday when he was buried by an avalanche on a little-used ski slope. Junginger was a native of Arosa, Switzerland.

Prince had been shot several times and his body was found in a ditch beside a highway. Myers was charged following discovery of Prince's cab at nearby Quesnel. Prince was reported missing Jan. 23.

Myers had previously been charged by Kamloops RCMP with the capital murder of James Johnson, 44, of Ashcroft, whose body was found last

Tuesday at Cache Creek, three miles north of Ashcroft, which is 50 miles west of Kamloops.

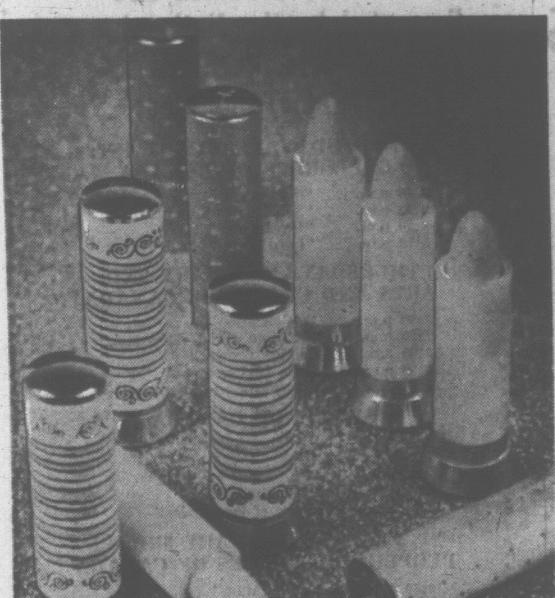

Both cab drivers were killed. George Wilson

Arthur Mayse

Tomorrow we will shiver or slosh into the only month of the year I detest—a period which is mercifully short but generally obnoxious.

It should be passed in hibernation, or on some warm beach by a lapis-lazuli sea. However, since the first course is impracticable and escape by the second route denied to most of us, we can but take hope from the height of the sprouted daffodils.

This, I realize, is silly thinking, and results from too many years spent where the winters are soft and grey rather than hard and bright. But we tend to be as our climate shapes us; and even though the only snow to fall on me so far this winter was mixed with rain, I sit here growling in typical Victoria fashion about the weather.

The cure, for me, is exposure to real weather—the kind with a bite to it—and there's plenty of this waiting where the winter springs cruise deep off Ten Mile Point.

That relief is denied me this week, though. First, there are jobs that need doing. Even if I could wiggle out of them, an ominous crunching when I shifted our boat trailer the other day hints of wheel bearings salted once too often.

So all that remains is, between grumbles, to remember days when the sun did shine from dawn till its setting, and an angler who prefers summer trout to winter trolling could follow a bright stream.

I have been lucky enough to enjoy a great many such; and while they are not neatly catalogued and filed like color slides, certain days, hours or episodes emerge from the jumble.

There is, for instance, a very clear recollection of a July morning when my father bade me stay on the bank and keep quiet while he crept, scrambled and balanced his way along a log-jam under which lurked trout big enough to gulp a muskrat.

The traverse made, he prepared with infinite stealth to ease a worm-baited hook between logs.

To accomplish this manoeuvre, he had to kneel; and as he settled himself, what appeared to be a curl of dark smoke rose from the vicinity of his left heel. Then, all in a moment, he was galloping over and through the jam for shore, trout-clutched in one hand and the other battoning at the wasps that had beset him.

It had taken all of five minutes to make the trip. He soared clear of the log-tangle in seconds, and with me and an advance-squad of wasps after him, fled to the sheltering woods.

At the time, I considered his flight in chest waders a matter for laughter. He didn't; and neither did I in later years when a warrior swarn dive-bombed me.

But my son did; and thus does history repeat itself.

Like many another fisherman, I don't care much for fish as a culinary item. This with the proviso that there are worse dishes than a brace of 14-inch cutthroat, nestled in a well-seasoned pan with a strip of bacon in each belly cavity and the merest dusting of corn meal on their speckled sides.

Perhaps even better is the trout that never ends up with peas and potatoes on a plate.

I've tangled with mephish, such, and most stream days, take the loss of a good fish in the spirit of Father Walton, who points out that a man after all can't lose what he's never possessed.

Still, there have been trout that I dearly longed to keep. These were junks of the sort that an angler rarely hooks; their chances of escape are amplified by weight and strength and acquired wisdom.

Last year, when we came to the up-Island river that has twined its way in and out of our lives, I hooked such a fish on a floating fly in the lee of a toppled alder.

We tussled together long enough for me to work him close and see him all glorious where he finned suspended in water only less clear than air. Then he rolled on the frail leader, lunged, and went free.

Landed, such a trout can be forgotten. Lost, it is remembered forever—and lurks to swim into an angler's dreams on just such unchancy winter days as these.

Boy Injured
In Fall
From Trestle

Lee Whitmore was a stick-in-the-mud Monday. It might have saved his life.

The 13-year-old and his buddy, Allan Quin, were wheeling their bikes across a railway trestle between Saanich Road and Quadra shortly after 5 p.m. when Lee's foot caught between two ties.

He toppled off the trestle, dropping about 35 feet into soft mud. His only injury was a broken collarbone.

Lee is the son of Mr. and Mrs. F. Garry Whitmore of 3115 Glasgow and with Allan, who lives at 3104 Quadra, was on his way home from a visit to his grandmother.

"It's a miracle he's even alive," Mrs. Whitmore said today.

She credits the soft mud below the trestle left by the winter's heavy rains as cushioning her son's fall.

Fire Damages 3-Storey Home At Langford

A fire around a furnace caused extensive smoke damage to a Langford home this morning.

Mayor Stephen suggested the Dowell Building.

The blaze broke out shortly before 10 o'clock in the three-storey stucco house of Mr. and Mrs. Fred Smith, 2375 Wentworth. Their three children were at school and Mrs. Smith was visiting a neighbor.

The fire followed furnace trouble during the night and came shortly after a power failure in the area, said Mrs. Smith.

It was spotted by a garbage man who first thought the smoke drifting from the room was steam.

One wall of the basement had to be pulled apart to fight the flames.

A Langford fire department official refused to comment on the blaze when contacted shortly before 1 p.m.

YMCA OFFERS REWARD FOR 100-MILERS

Silver Spoons for the Gasping

Citizens who can run 100 miles in 1967 will receive a special award from the YMCA.

Art Burgess, physical fitness director for the Y, has asked Victoria city council for assistance in marking out two mile courses to enable runners to log their century in miles.

Parks administrator H. R. Warren told the parks committee this morning he would be more than happy to lay out mile-markers along Dallas Road and the cliff paths.

The entry fee will be \$1 after which the contestant will receive a special score card. On presentation of the card with

Rules for runners are that they must be 18 years or more; that they must run not less than one mile a day and not more than three miles a day.

The reward for logging 100 miles—all marked on special cards by the honor system—will be a silver spoon with a special crest.

A final decision on the Victoria mile courses (there will be two in each municipality) will be made by Mr. Warren at Beacon Hill Park or Dallas Road the favored locations.

'WE DON'T WANT LEGISLATION'

Car Firms to Institute Own Safety Features

By AB KENT

Times Business Editor

The Canadian auto industry will bring in safety features voluntarily in hopes of staving off government compulsion; a Brampton executive said here Monday.

Neil Gaskin, vice-president of sales for American Motors (Canada) Ltd., said most of the safety developments made mandatory by the U.S. government for the American auto industry will be put into Canadian production.

"We don't want legislation," he explained.

FEAR LAWS

"We are afraid of government legislation because it is not oriented to public demand."

In effect, compulsory safety features merely raise the price of the product to the disadvantage of the buyer, he said.

What the industry and the public both want is freedom of choice, the executive said.

Asked what he felt about the possibility of more embracing Canadian legislation, he said:

"Any more stringent law in Canada than in the U.S. would be asinine."

SIDE EFFECTS

Meanwhile, he expects side effects in Canada as a result of the American legislation.

By 1968 it is possible there will be mandatory anti-air pollution devices required on all new cars.

Such a device would have to be engineered into the auto, Mr. Gaskin said, and therefore "we would have no choice but to build it in," even though it would have limited usefulness in Canada.

\$50 PER CAR

The extra cost would be about \$50 per car, he said.

Seat belts are an example of the way manufacturers have been forced to comply with legislation, with little support from the motoring public, Mr. Gaskin said.

"Now we have to put extra things in cars to get rid of the seat belt, to roll it up out of the way. I don't use the seat belt. Do you?" he said.

Crowded Class Statement Due in Session

Education Minister Peterson today said he will have an announcement to make on the pupil-teacher ratio later this session.

He was commenting on the B.C. Teachers' Federation proposal that its members will refuse to teach overcrowded classes, particularly those with 40 or more pupils.

"I'm sure the matter of pupil-teacher ratio, which I gather is the basis of their complaint, will be discussed at this session of the legislature," he said.

He declined to elaborate because he plans to outline his stand "either in the budget debate or when my estimates are before the House."

In a letter to council the association requested the city's assistance in finding office space from which to direct their May 24 efforts.

They asked that it be, if possible, on Centennial Square.

But the public works committee was informed this morning that there was no suitable accommodation in city hall.

Mayor Stephen suggested the Dowell Building.

The blaze broke out shortly before 10 o'clock in the three-storey stucco house of Mr. and Mrs. Fred Smith, 2375 Wentworth. Their three children were at school and Mrs. Smith was visiting a neighbor.

The fire followed furnace trouble during the night and came shortly after a power failure in the area, said Mrs. Smith.

Kaisins, nuts and spices combine to give this quick bread a special flavor—perfect for a dessert or tea treat. Serve it warmed and topped with a dollop of whipped cream to please even the most discriminating palate.

Spicy Nut Bread Stars at Desserts and Luncheons Too

TEA HOUR TREAT—IN DOUBLE-QUICK TIME

Quick breads are a delight to raisins, brown sugar, butter and cinnamon.

They are easy to make, fast to bake, and can be served either direct from the oven, cold and buttered in a lunch box or rewarmed for elegant teatime enjoyment.

This recipe for Quick Raisin Nut Bread combines your kind of favorite chopped nuts and one cup of raisins in a cinnamon flavored batter. As an additional touch of delight, there is a baked-on crumble topping of

butter. Crumble on top of or butter. Crumble on top of

the round in a tubular pan and the result is a wreath-effect delight midway between a cake and a bread with the appeal of both.

QUICK RAISIN NUT BREAD

Three and three-quarters cups once-sifted all-purpose flour, $\frac{1}{2}$ cup granulated sugar, $\frac{1}{2}$ teaspoons baking powder, $\frac{1}{2}$ teaspoons salt, 3 tablespoons salad oil, 2 eggs, $\frac{1}{2}$ cup milk, 2 teaspoons cinnamon, 1 cup raisins, $\frac{1}{2}$ cup chopped nuts, $\frac{1}{2}$ cup brown sugar, $\frac{1}{4}$ cup margarine or butter.

Sift together $\frac{3}{4}$ cups flour, granulated sugar, baking powder, salt and $\frac{1}{2}$ teaspoon cinnamon, in a large mixing bowl. Beat eggs until fluffy and add milk, oil, $\frac{1}{2}$ cup raisins and

add wet ingredients, mixing only enough to combine.

Pour into a greased tub pan. Combine brown sugar, remaining $\frac{1}{2}$ cup raisins, remaining tea spoon cinnamon, and $\frac{1}{2}$ cup flour and margarine

and mix well. Pour over batter. Bake in a pre-heated moder-

ate oven (350 deg. F.) for 35-40 minutes or until done. Remove from pan gently, to let cool on a wire rack. Yield: One tube-pan cake.

DEAR ABBY . . .

Wife Doesn't Know How Lucky She Is!

By ABIGAIL VAN BUREN

DEAR ABBY: We are a two-car family. I have my car and Sam has his. When Sam's car is down to its last ounce of gasoline, he borrows MY car, and leaves me with an empty tank.

Then when Sam has used up all the gas in MY car, he gives it back to me and I can barely make it to the filling station. How can I teach him a lesson, Abby? This one fault of his drives me crazy. Otherwise he is a faithful, hard-working, sober, good-natured, generous guy. Any advice?

BERT

DEAR BERT: Yes, keep your zippered. With all those virtues he's entitled to one lay-bitful fault.

DEAR ABBY: I have a bachelor friend who is a respected professor in his community. He often entertains his friends at his apartment, which is situated next to the laundry room.

Invariably, when all the guests are comfortably seated and in the midst of an interesting conversation, the professor announces, "As long as we're sitting, I may as well run a load of laundry through."

Then he starts banging around, looking for soap, gathering his laundry, and running next door with his quarters for the machine. When he returns, the conversation is resumed until "bleach time." After all the cycles are finished, the professor absents himself once more to "hang" his laundry.

The last time this took place I told him I thought he was extremely rude. Was I wrong to complain? Or is it considered proper for a host to do his laundry while entertaining guests?

MIFFED

DEAR MIFFED: "Professor Clean" should do his laundry on his own time. And if you think he's rude, say, "No soap" to his next invitation.

DEAR ABBY: I don't object so much to a person's having a

Penny's 'Old Flame' Is Ablaze With This

By Penny Saver

Our house was the scene of a great gathering the other day. It began in the afternoon and kept going until late evening. Actually, we couldn't have picked a worse day as far as the weather was concerned. A small-scale blizzard (without snow) was raging outside, and inside, the drafts made the house icy cold. Ah, for a crackling fire blazing in the fireplace! Penny made her gallant performance with crumpled papers and smothered them with too many logs. With the help of one of the guests (a former Boy Scout), the two of us struggled for half an hour before we created a tiny fire. (One guest ribbed us with, "My, that's the cutest little fire I've ever seen!")

Once we had the wee fire going, it didn't take long to build it up to a roaring blaze. Yet, I feel that I'm going to be the subject of many a joke because of the time it took to build the initial anaemic effort.

I have a surprise for them next time I'm making a fire. I'm going to be crafty and use a new fire starter that I found, selling for 98 cents. This comes in a container that looks like a giant tooth-paste tube. Simply squeeze out the amount of jelly that you need and set a match to it. There's no waiting and you don't need to blow dying embers to make a flame!

This fire starter has many other uses as well. You can use it as a torch, as a warning marker if you're travelling at night and have a flat tire or even as an emergency beacon if you're in trouble on a boat in the dark. The jelly produces a flame that is windproof and waterproof. It will even burn in water!

For around-the-house use, spread a little jelly on frozen pipes to defrost them in a hurry. Keep a tube in the car and in your home.

Another item to keep in the glove compartment is a squeezable bottle of a liquid that clears ice and dirt from the windshield. Simply squirt some of the fluid on the window and turn on the wipers. For summer use, add one bottle to a gallon of water to wash the car with—it leaves glass and body spotless and shiny. Price per bottle is 89 cents.

Don't stay "in the dark" about these items. Give me call at 382-3131 and I'll tell you where to find them.

Mr. and Mrs. R. W. Fussey, 1480 Edgeware Road, have announced the forthcoming marriage of their eldest daughter, Jacqueline May Lilian, to Mr. Stanley Thomas Thame, eldest son of Mr. and Mrs. S. A. Thame, 138 St. Lawrence Street. The wedding will take place on Friday, February 17 at 7 p.m. in St. Alban's Church. (Just-Rite Portrait Studio.)

Mr. and Mrs. John Charles Lawrence, 90 Lurline Avenue, announce the forthcoming marriage of their second daughter, Marilyn Joan, to Mr. Robert George Carter, only son of Mr. and Mrs. George Millard Carter, 612 Canterbury Road. The wedding will take place on Saturday, March 4 at 8 p.m. in St. John's Anglican Church with Canon Grahame Baker officiating. (Gordon Jolley photos.)

Given to Hospital by Auxiliary

EXPLAINS NEW EQUIPMENT

The evaluation of heart problems, and easier and more complete diagnosis are the two major purposes of the Royal Jubilee Hospital's new cine-radiographic equipment, Dr. J. L. Murray Anderson told the hospital's Woman's Auxiliary at the group's annual meeting held recently.

Giving a simplified explanation of the equipment, Dr. Anderson, hospital medical administrator, said the new apparatus converts still X-rays into moving pictures. Films can be run again and again to permit fuller study, he said.

As an example, Dr. Anderson explained how the injection of colored fluid into a vein could be traced through the pictures as the fluid passed to the heart; making it easier to diagnose and study heart problems.

As a centennial project, the auxiliary had contributed \$5,000 toward the new equipment.

In her report, treasurer Mrs. Amy Deas noted that the biggest fund-raising projects had been television rentals, cradle photos, maternity project, a bridge-tea and coffee party. Receipts totalled \$6,041.81.

OTHER DONATIONS

Disbursements were \$7,863.25, she said, with major expenditures being the donation for the cine-radiographic equipment, buying of a defibrillator, four television sets, baby spoons, and The Lena Mitchell Bursary. Total balance on hand is \$1,774.66.

Speaking on the work of the various committees, recording secretary Miss Edna Wallace noted that members had given 380 hours of volunteer work preparing dressings during the year, and that 31,872 had been made.

Miss Wallace reported that Mrs. J. C. B. Keane had attended the nurses' graduation ceremony when the Lena Mitchell \$400 bursary had been presented to Miss Marilyn Phillips for advanced training. The secretary noted that the bursary had been changed to the Lena Mitchell Educational Fund, to enable more members of the hospital staff to obtain advance a

training and education.

Named as auxiliary president was Mrs. J. C. B. Keane and other new officers are Mrs. D. C. Fry, first vice-president; Mrs. W. R. Jeffs, second; and Mrs. C. K. Rourke, corresponding secretary. Returned to office were treasurer Mrs. Deas, recording secretary Miss Wallace, and membership chairman Mrs. I. F. Rigby. Mrs. C. C. Riach was retiring president.

A tea followed the meeting in the nurses' residence with Veterans' Hospital Women's R. F. Hawes.

Mrs. Owen Re-Elected Head of Hospital WA

Mrs. E. R. Owen was re-elected president of the Gorge Road Hospital Auxiliary when the group held its annual dinner meeting in the Dominion Hotel.

Serving with her are: Vice-president, Mrs. W. K. Hardy; recording secretary, Mrs. G. F. Hilliard; corresponding secretary, Mrs. A. Mawer; and treasurer, Mrs. C. Douglas. Past president is Mrs. G. Callan.

Elected as directors for one-year terms were Mrs. Callan and Mrs. R. Lewis. Serving as directors for two years will be Mrs. W. Green and Mrs. A. L. Campbell.

Mrs. C. C. Warren, president of the hospital's board of directors and an honorary member of the auxiliary, installed the new officers. As representative of the board, Mrs. Warren thanked the group for its substantial support. She said that the hospital now had 99 beds and was making plans for further expansion. Mrs. T. G. Dalzell, retiring corresponding secretary, was chairman of the nominating committee and conducted the elections.

In her presidential report, Mrs. Owen pointed out that the main money-raising projects during the past year had been a

Auxiliary president Mrs. F. R. Roberto presiding at the refreshment table.

Other special guests attending included hospital board of directors' chairman Cmdr. A. C. Wurtele, Mrs. Daryl Elford, hospital administrator George Masters, staff members, the Misses Betty Moore and Margaret Plunkett, president and secretary of St. Joseph's Hospital-WA, Mrs. W. Rogers and Mrs. R. Kay, and president, Women's Auxiliary to the Handicapped Children's Clinic, Mrs. Jack Devlin of Edmonton.

Parents Here

Mr. and Mrs. Patrick Romaine travelled from their home in Kinnaird, B.C., to attend the wedding of Miss Sharyn Hinton and their son, Mr. Michael Romaine, Saturday evening. Also here from Kinnaird was Mr. Dan Romaine and Miss Shirley Dodgson.

Other out-of-town guests included Mr. C. Romaine and Mr. Sirokai, Mrs. B. Beischer, Mrs. G. Rozon, Mrs. B. McKay, Pat Lum, Lynn Sawchuk and Jean Ngai.

Attend Wedding

Out-of-town guests in Victoria to attend the wedding, Saturday afternoon, of Miss Elizabeth Crozier and Mr. Bob Smirl included Mrs. E. McKee, Miss M. Watmough, Mr. and Mrs. F. Lockwood, Mr. and Mrs. W. Gower, and Mr. and Mrs. R. Gower, all of Vancouver; Mr. and Mrs. R. Warner of Stanwood, Wash.; Mr. and Mrs. G. Fagan of Port Alberni; Mr. and Mrs. E. Peacock of Mesachie Lake, and Mr. and Mrs. T. Burgess of Ladner.

Bride Honored

Mrs. David Foster, the former Janet Storey, was honored at a shower recently held in the Eastowne Road home of Mrs. A. McKeever. Corsages were presented to the honor guest and her mother-in-law, Mrs. C. W. Shearing. A decorated wishing well held gifts. Invited guests included Mrs. Nova Graham, Mrs. Beryl Keyes, Mrs. G. Lomas, Mrs. R. McDonald, Mrs. T. Stewart, Mrs. O. Willner, Mrs. T. G. Cheston, Mrs. W. A. Shearing, Mrs. J. Foster, Mrs. Irene Kelway, Mrs. E. J. Bell, Mrs. R. McKeever, Mrs. D.

CLUBWOMEN'S NEWS

Pian Party — Details for the piano and sherry party to be given by the Women's Auxiliary to the Veterans' Hospital were finalized when the group met recently in the hospital. It was reported that the party would be held on Wednesday, Feb. 15, from 11:30 a.m. to 1:30 p.m. in the home of Dr. and Mrs. A. E. Alcorn, 2620 Lansdowne Road.

Visiting committee chairman Mrs. J. K. Murray announced that 241 patients had been visited in December and comforts were distributed. Mrs. H. Jarvis reported that 11 patients had been given birthday presents. Mrs. Lewis said 412 library books were distributed. Reporting on the sale of dogwood brooches and earrings was Mrs. F. T. Sehl. It was also announced that president Mrs. Jarvis had presented the veterans' "Class of '29" with a card containing silver dollars.

Dunsunir District — The annual meeting of the Local Association of Guides and Brownies, Dunsunir District, will take place on Tuesday at 8 p.m. in St. Barnabas' hall, Begbie Street and Belmont Avenue. Miss Helen Woolard, one of two Canadian Guides chosen to spend two months last summer in the United States and Mexico as a guest of the Girl Scouts of America, sponsored by the Juliette Low Foundation, will speak of her trip. Refreshments will be served following the meeting.

Givency Show Today

PARIS (AP) — "Elegant, beautiful, superb," was the way buyers summed up Givency's spring and summer fashion collection today.

Givency showed to buyers only, with a presentation for the press set for next month.

Buyers had raves for Givency's sleeveless dresses, belted blouson and soft evening and cocktail dresses.

Givency went his own way, designing clothes for people who have the money, the time to wear them and a love of beauty.

The collection is soft and feminine. Coats have restrained dolman or raglan sleeves. Gold chains are used, sharing honors with leather belts. Sometimes the two are combined. Some shoulder tabs appear on coats, also touched with metal, gilt or copper.

CLUB CALENDAR

Valentine tea, St. John's Anglican Church Older Young People's Group, Saturday from 2 to 4:30 p.m., The Bay Douglas Room.

SNEAKERS by Jessie & Mary

Make use of your time. Study while drying your hair.

Photo: MICHAEL BELLINGER, DUNN & CO.

The dark green wool suit which the new Mrs. Romaine wore for travelling was accented with a small mink collar. She chose black accessories and yellow roses in corsage to complement the ensemble.

Of Personal Interest

ON FINAL TOUR

His Honor the Lieutenant-Governor will give a luncheon at the Union Club on Wednesday. His guest of honor will be Dr. A. H. Zimmerman, chairman of the Defence Research Board, who will be here from Ottawa to visit the Pacific Naval Laboratory in HMC Dockyard, as part of a tour of defence research establishments in the Pacific area. This is Dr. Zimmerman's final tour before his retirement.

Mr. R. F. Chinlick, PNL's chief superintendent, will host the visitor at a reception in the Dockyard Officers' Club later that day.

Alumnae Dinner Plans

The Alumnae Association of the Royal Jubilee Hospital's school of nursing will hold its annual 'no host' dinner at the King Arthur's Round Table on Friday, February 10, beginning with a social hour at 7 p.m. with a full-course chicken dinner being served at 8 p.m. Among the invited guests at the head table will be Miss Muriel Thompson, the hospital's director of nursing; Miss E. Maude-Moore, director of education; Miss A. Frijouf, president of the Vancouver branch; Miss L. Woodrow, past director of nursing, and Miss C. Dakin, president of the Student Nurses' Council. Also at the head table will be alumnae president, Mrs. R. A. Bolt, and past president, Mrs. A. E. Mourant. Reservations may be made before next Tuesday by phoning 382-9029 or 385-3934.

Campbell, Mrs. E. C. Wilson, Mrs. G. Argall, the Misses Rhoda, Elsa and Bessie Foster.

Surprise Fete

Mrs. Richard Norton, the former Ellen Hansen was surprised with a shower recently given by her co-workers at Margo Beauty Studio. Guests attending the affair, in the Admirals Road home of the bride, included Mrs. R. Logie, Mrs. L. Sirokai, Mrs. B. Beischer, Mrs. G. Rozon, Mrs. B. McKay, Pat Lum, Lynn Sawchuk and Jean Ngai.

In her treasurer's report,

Mrs. R. T. Meyer noted that

\$1,500 had been raised at the annual bargain sale.

It was also reported that the auxiliary had provided a medical library (valued at \$250) for the hospital had purchased a vaporizer, bookshelves, pictures, chairs and a power lawnmower. The group had provided Christmas cheer for patients and gifts for the staff and sent a donation to the Canadian Arthritic and Rheumatism Society.

Mrs. Meyer also noted that

construction and forming a speech was the lesson given by Mrs. C. C. Warren during the recent meeting of the Victoria Toastmasters Club No. 90, held at the Empress Hotel.

Impromptu speeches and criticisms were given by president Mrs. K. S. Bains, Mrs. G. Gibbons, Mrs. H. E. Hubbard, Mrs. J. M. Speers, the Misses Donna Keppel and Jennifer Jones.

Toastmistress Mrs. P. A. Petersen was introduced by Mrs. W. H. Davies, and Mrs. R. Pleasance introduced the table-top mistress, Mrs. Gibbons. General evaluator was Mrs. E. J. Brady. Also taking part in the program were Mrs. A. E. Cooper, Mrs. Hubbard, Mrs. R. M. Creed, Mrs. N. Blackmore and Miss Donaldia Lentz.

A special guest, Frank Erikson of Camosun Toastmasters' Club, extended an invitation for members to participate in a joint meeting in February.

Other guests were new member Mrs. Penny Dew, and Mrs. J. Hunter, Mrs. L. Rowbotham and Mrs. D. Wallace.

Forty members attended the annual meeting. Refreshments were served during the period set aside for sewing.

AT MEETING ON SALTSpring ISLAND Names New Slate of Officers

Mrs. Douglas K. Wilson was elected president of the Women's Auxiliary to the Lady Minto Gulf Islands Hospital when the group held a recent annual meeting in the hospital's board room at Ganges. Serving with Mrs. Wilson will be vice-presidents Mrs. P. H. Lazebny and Mrs. Arthur Hudson; secretary, Mrs. Edwin Worthington; treasurer, Mrs. G. L. Sproule; publicity convenor, Mrs. E. A. Jarman, and sewing convenor, Mrs. P. F. Knowles.

Acting as a nominating committee were Mrs. A. M. Brown and Mrs. Maurice Atkins.

The new president read the report of the retiring president, Mrs. A. K. Wilson. In it, records showed that members had given 174 hours to hospital sewing (valued at \$289) and that auxiliary funds had been boosted by the sale of items made and donated by Mrs. Anne Thompson, Vesuvius Bay, and V. A. Bishop. Mrs. Thompson's contribution had been four

hand-made quilts and Mr. Bishop had helped the group with the building of attractive bird feeders.

In her treasurer's report,

Mrs. R. T. Meyer noted that

\$1,500 had been raised at the annual bargain sale.

It was also reported that the

auxiliary had provided a medical library (valued at \$250) for the hospital had purchased a vaporizer, bookshelves, pictures, chairs and a power lawnmower. The group had provided Christmas cheer for patients and gifts for the staff and sent a donation to the Canadian Arthritic and Rheumatism Society.

Mrs. Meyer also noted that

construction and forming a speech was the lesson given by Mrs. C. C. Warren during the recent meeting of the Victoria Toastmasters Club No. 90, held at the Empress Hotel.

Impromptu speeches and criticisms were given by president Mrs. K. S. Bains, Mrs. G. Gibbons, Mrs. H. E. Hubbard, Mrs. J. M. Speers, the Misses Donna Keppel and Jennifer Jones.

Carsnip Not Yet Perfected

By JACK BEASTALL

The dedicated vegetable gardener is always trying something new, even a new strain or selection of a crop he has grown for years.

In fact, there are no vegetables which are entirely new.

No one has succeeded in crossing a carrots with a parsnip to give us a carsnip, nor corn with potatoes to provide cornettes.

Yet the average home vegetable gardener hears of a vegetable he has never grown. These are not new, but they often classify very well as unusual.

Many vegetables have never found a favor with English palates, or more to the point, have needed what English cooks consider "fussy" preparation.

One such vegetable is salsify. It is a root of high quality, the growing of which is considered a test of the gardener's skill.

If the gardener succeeds, the cook's skill will certainly be put to test, for preparation and serving can make or mar the dish.

Salsify is a root similar to the parsnip, requiring the same soil preparation or compost filled holes, and no freshly applied manure because it causes the roots to become forked and useless.

LEMON JUICE

For the table, the roots are quickly scraped and steeped in water containing lemon juice or vinegar to prevent discoloration, after which they are boiled until tender.

Salsify is often called the Vegetable Oyster Plant. To prepare this dish, the boiled roots are cooled, cut into slices and quickly fried in butter to a light golden brown after dusting with salt and pepper.

The real chef serves them with crimped parsley sprigs and a sauce made with butter, flour, and the liquor from a can of real oysters.

'They Look Like Those Facilities'

It was complaints day at the Chamber of Commerce retail merchant group Monday:

A. G. Coning was all for abolishing the Bastion Square kiosks on which anyone with a cause to celebrate may paste signs and posters.

But without supervision they tend to get scruffy looking, he said.

"They were a mistake in the first place," he muttered.

Lloyd Davies agreed they look awfully with posters flapping and torn in the wind and rain.

"They're an eyesore. Their use should be discontinued," Mr. Coning said.

They reminded him of the outside walls of certain European sanitary facilities.

And still in the complaining mood, he said the city should finish the street surfacing job begun on Wharf Street below the square, which he finds very rough.

Ray Rose said it had been drawn to his attention many times that city hall doesn't fly a flag on Saturday, even though the town is busy with shoppers.

Each matter will be drawn to the attention of city council, or the civic administration.

CARELESS DRIVERS

Fined for careless driving when they appeared in traffic court Monday:

Richard Carver, 2227 Dunlevy, \$35; Shirley Harrison, 841 Collinson, \$40; Larry Leno, 3426 Bethune, \$40; Ronald Wood, 1702 Belmont, \$50, and Cecil Thurston, 845 Burdette, \$40.

Ankle Broken In Car Mishap

Wendell Johnson of 1511 Fell Street suffered a broken ankle early Sunday in a two-car crash on the Old Island Highway at Four Mile Hill.

Cotwood RCMP officers said he was the driver of a car eastbound which collided with an oncoming auto driven by Lloyd Brydon of 2823 Knotty Pine Road. Damage was estimated at \$1,000.

RECREATION ON AGENDA

Saanich council will spend a whole evening Monday, Feb. 13, considering the massive indoor recreation report made last Christmas.

The report, prepared by a firm of consulting engineers, recommended three community centres in a \$4.5 million plan extending over the next 20 years.

VICTORIA DAILY TIMES, TUESDAY, JAN. 31, 1967-23

More About Eaton's

Hey there action-seekers, Eaton's is alive with the people and events that make shopping an adventure! No mid-winter doldrums here . . . there's something going on every minute . . . from all that's new in fashions to self-improvement classes, from contests with action-prizes to good eating . . . it's shopping with an extra fillip, shopping that's pure fun whether you're browsing or buying. Here are three-for-action instances:

Teen-age Sewing Contest

If you're a girl between the ages of 13 and 19, with a flair for sewing . . . and for fashion . . . Eaton's, McCall's patterns, the Canadian Cotton Council and Canadian Pacific Airlines are sponsoring a sewing contest with a terrific list of prizes! A week-long trip to Hawaii for the Grand Prize winner and her travelling companion . . . plus a one-week trip to EXPO '67 for the Regional winner (someone right here on Vancouver Island)! PLUS one console and one table model sewing machine to the second and third regional prize-winners respectively . . . see these machines displayed in our Douglas Street window, now! PLUS four more major prizes and consolation gifts for 23 other finalists. So you can see your chances of winning a prize for your entry is better than good. To enter, call in at the Fabric Dept. of the Eaton store in Victoria, Duncan or Nanaimo and pick up the printed rules . . . start your project right away. All entries must be submitted no later than store closing Saturday, March 4, 1967.

Fashions While You Dine . . .

At the Captain's Table in Oak Bay Marina Restaurant. Each Thursday at 8 p.m. for the next four weeks, Eaton's will turn the "Spotlight on Fashion" to bring you all that's new and beautiful for Spring '67 while you enjoy the fine cuisine at the Marina. And don't be afraid to bring along your husband, he'll enjoy the evening as much as you will. Helen Beirness commentates . . . Bevan Gore-Langton presides at the organ . . . the fashion show is free of charge. Make your reservation now by dialing 586-7222.

Family Smorgasbord

Plan to do your weekend shopping at Eaton's Thursday or Friday evening, when you can treat your family to dinner out. Eaton's Victoria Room is featuring a delectable Smorgasbord each Thursday and Friday between the hours of 5 and 7:30 p.m. Even the "pickiest" of small diners will enjoy the array of tempting foods, right down to a choice of dessert and beverage. Adults 1.75, children under 12 years 1.25.

—Victoria Room,
Fourth Floor

NEW CHINA WALL RISES BUT IT'S IN MOSCOW

MOSCOW (Reuters) — Workmen today completed the erection of a six-foot-high wooden wall around the Lenin Mausoleum in Moscow's Red Square, apparently to forestall possible Chinese demonstrators.

A policeman in the square said the wall was erected because of repairs to the mausoleum, which would stay closed to visitors for two months.

Nearly 70 Chinese students were involved in a melee with Russians outside the tomb last Wednesday, and the Chinese Embassy later claimed 30 were beaten by Russian police.

Rich Mineral Strike Made Under Water

By AB KENT
Times Business Editor

The most exciting mineral discovery since the molybdenum balloon went up five years ago has focused scientific mining and political attention on B.C. undersea territories.

Evidence of rich deposits from an underwater peak in Jervis Inlet, lying east of Vancouver Island 80 miles north of Vancouver, was confirmed Monday night by Mines Minister Donald Brothers.

The find is in the form of nodules containing a high percentage of manganese oxide, nickel and copper.

A three-man research team from University of B.C. discovered the occurrence and has been sitting on the story since last June.

To stop a rush of speculation and promotion, the B.C. cabinet Monday passed an order reserving to the Crown all minerals rights lying under tidal waters.

EXPLORATION

It stops any person from gathering samples, drilling or digging in connection with offshore exploration without prior approval of the provincial government, whether or not the province has actual claim over such submarine lands.

B.C.'s claim to the continental shelf lying off the west coast was made last year, and prior to that the provincial government had claimed offshore petroleum rights, resulting in a dispute with the federal government.

TIDAL WATERS

The new order covers all bases by referring to tidal waters, which includes such places as river mouths and coastal lakes like Nitinat on the west coast of Vancouver Island, as well as extending as far seaward as it may be practical to explore the ocean floor.

"We want to be absolutely sure it covers both placer mining and standard mining techniques," said Mr. Brothers.

Meanwhile, the Supreme Court of Canada must decide on whose jurisdiction offshore waters are.

WRITING THESIS

The UBC team consisted of 21-year-old graduate student Robert D. Macdonald, who is writing a thesis on the marine geography of Jervis Inlet, team leader Dr. James W. Murray, assistant professor of geology, and Dr. E. V. Grill, chemical oceanographer who assayed samples.

The nodules, or lumps of mineral deposit, were precipitated out of the sea water and recovered from a 400-foot ridge lying 1,200 feet beneath the surface of the inlet.

They assayed up to 38.1 per cent.

End the Bugging Probe, Pass New Laws'—Stupich

Premier Bennett Monday was asked to dismiss the Sargent Royal Commission on "bugging."

Dave Stupich (NDP — Nanaimo) told the legislature the royal commission is not needed to protect people against electronic eavesdropping.

What is needed, he said, is legislation to end the evil. The Sargent commission seems far more interested in "listening in" on private conversations than in investigating the extent of bugging, said Mr. Stupich in the throne speech debate.

"They just want to get in on the eavesdropping," he added.

Speaker W. H. Murray asked

Mr. Stupich to show more respect for the commission.

"I don't have any particular respect for it," Mr. Stupich replied.

The commission is currently in session in Vancouver. It was established by cabinet order after police seized bugging equipment used in a Vancouver hotel during a trade union convention.

The commission was found to be improperly constituted and was dissolved, then later reformed with new terms of reference.

Mr. Stupich said the matter grew from a breakaway move by a group within the Inter-

national Pulp, Sulphite and Paper Mill Workers' Union. The breakaway group formed the Canadian Pulp and Paper Workers' Union, but the B.C. Labor Relations Board refused to certify it.

The battle between the two unions was highlighted by the bugging incident. An officer of the international was blamed for eavesdropping on the Canadian union officers.

Mr. Stupich said the royal commission was "established when the premier saw a golden opportunity to drive a wedge between the NDP party and the pulp mill workers." (The party would have to support one side or the other.)

He charged also that the decision to refuse certification to the Canadian union was "a political decision made in the premier's office."

"That's a complete falsehood," said Premier Bennett.

He said the decision was not made in the premier's office, directly or indirectly.

"Surely you haven't been trying to bug the premier's

Oxygen Fire Kills Another In Space Cabin Experiment

Washington, D.C. Fellow astronauts salute at left as honorary pallbearers. Chaffee was also buried at Arlington. White was laid to rest at West Point. President Johnson attended the Arlington service.

2nd Airman Hurt In Rabbit Test

SAN ANTONIO, Tex. (AP) — A fire similar to the one that killed three Apollo 1 astronauts Friday at Cape Kennedy, Fla., raced through a space cabin simulator today at the School of Aerospace Medicine, killing one airman and critically injuring another.

Initial reports said the inside of the pressure chamber was "completely charred," as was the Apollo craft at Cape Kennedy.

A Brook Air Force Base spokesman said the airmen were performing maintenance in a pressurized environment of 100-per-cent oxygen in an experiment designed to study the effects of pure oxygen on the blood of rabbits.

Ten of 12 rabbits in the chamber were killed. The spokesman said the airmen were in the chamber to monitor and tend to the rabbits.

The atmosphere chamber is a large rectangle with part glass on one side and with double atmosphere locks, so that a person can go into a tiny room, close the door and then open another to step into the main chamber to prevent the pressure dropping.

The cabin, essentially a long steel cylinder, is in the centre of a large space chamber building. Related experiments are often conducted with volunteer airmen accepted from among basic trainees.

CHAMBER HAS HATCH

The chamber, about 20 feet long, sits on a three-foot-high foundation. Over-all, it is about nine feet high, allowing a man to stand up inside, where the diameter is some six feet. There is a hatch at one end.

The Apollo capsule, on the other hand, is a 12-foot-high rectangular vehicle. It is 12 feet, 10 inches overall at the base and weighs 12,000 pounds.

One observer said that, although the pressure in the Apollo was considerably greater than in the San Antonio chamber, the pure-oxygen environment would tend to make the fires burn similarly.

The chamber's pressure simulated that experienced at 18,000 feet altitude.

Representatives of the 3,400 member Montreal Policemen's Brotherhood are scheduled to meet today to reconsider salary proposals which the men rejected the first time round. Their contract expired Dec. 1 and union spokesmen say the police may have to hold study sessions if their demands are not met.

The collective agreement for Montreal's 2,350 firemen expired at the same time. However, negotiators for the firemen's union said they are waiting for the city and the policemen to settle their differences before resuming talks.

PLANS 'FINAL' OFFER

The city has said it expects to submit a "final" pay offer to the office workers Thursday.

The white-collar workers are members of the National Union of Municipal Employees, an affiliate of the Confederation of National Trade Unions.

They have demanded a 20-per cent increase over two years plus a flat \$700 for each member. The men earn an average of \$5,600 a year.

The city originally offered increases ranging between four and seven per cent over two years, but the terms of its latest offer were not disclosed.

He described his talk with de Gaulle as "very informative and very helpful to me."

The French president was a known admirer of the senator's brother, President John F. Kennedy.

De Gaulle is known to favor U.S. commitment to a definite withdrawal of its troops to prepare for peace negotiations.

The chamber's pressure simulated that experienced at 18,000 feet altitude.

The brief said marriage should be approved in the House and asked for a brief today to the parliamentary divorce committee.

The brief said marriage may break down because persons enter into it "at too young an age." The present minimum age for marriage without consent of parents is usually 16 in Canada.

"Standards of living and educational demands for employment have changed since these

age limits were set by the provinces," the brief said.

Presented by Mrs. F. E. Urquhart of London for the 700,000-member organization, the brief recommended widening divorce laws to include insanity, cruelty and desertion as well as adultery.

Amendments to the divorce act should be approved by each province at its own discretion.

Another recommendation asked that the wife be allowed to sue for divorce in the province where she lived with her husband. At present, the wife

must sue in the province where the husband now lives.

The brief said changes may have to be made in divorce court structure to lower the cost of divorce.

The lack of money required to institute the legal process to obtain a divorce has caused many people to live common law.

This illegal state caused suffering to children of such a union and engendered lack of respect for the law and the marriage state.

PARTICIPATING in a Centennial Commission physical fitness test, along with a group of school children, 12 of Canada's top athletes met Prime Minister Pearson in Ottawa today.

Seen with Mr. Pearson from left to right: swimmer Elaine Tanner of Vancouver; skier Nancy Greene of Rossland and speedskater Marjorie Turner of Lockport, N.S.

Victoria Daily Times

VICTORIA, B.C., TUESDAY, JANUARY 31, 1967 — PAGE 13

Arthur Mayse

Tomorrow we will shiver or slosh into the only month of the year I detest—a period which is mercifully short but generally obnoxious.

It should be passed in hibernation, or on some warm beach by a lapis-lazuli sea. However, since the first course is impracticable and escape by the second route denied to most of us, we can but take hope from the height of the sprouted daffodils.

This, I realize, is silly thinking, and results from too many years spent where the winters are soft and grey rather than hard and bright. But we tend to be as our climate shapes us; and even though the only snow to fall on me so far this winter was mixed with rain, I sit here growling in typical Victoria fashion about the weather.

The cruise, for me, is exposure to real weather—the kind with a bite to it—and there's plenty of this waiting where the winter springs cruise deep off Ten Mile Point.

That relief is denied me this week, though. First, there are jobs that need doing. Even if I could wiggle out of them, an ominous crunching when I shifted our boat trailer the other day hints of wheel bearings salted once too often.

So all that remains is, between grumbles, to remember days when the sun did shine from dawn till its setting, and an angler who prefers summer troutng to winter trolling could follow a bright stream.

I have been lucky enough to enjoy a great many such; and while they are not neatly catalogued and filed like color slides, certain days, hours or episodes emerge from the jumble.

There is, for instance, a very clear recollection of a July morning when my father made me stay on the bank and keep quiet, while he crept, crawled and balanced his way along a log-jam big enough to gulp a muskrat.

The traverse made, he prepared with infinite stealth to ease a worm-baited hook between logs.

To accomplish this manoeuvre, he had to kneel; and as he settled himself, what appeared to be a curl of dark smoke rose from the vicinity of his left heel. Then, all in a moment, he was galloping over and through the jam for shore, trout-rod clutched in one hand and the other batton at the wasps that had beset him.

It had taken all of five minutes to make the trip out. He soared clear of the log tangle in seconds, and with me and an advance-squad of wasps after him, fled to the sheltering woods.

At the time, I considered his flight in chest waders a matter for laughter. He didn't; and neither did I in later years when a warrior swarm dive-bombed me.

But my son did; and thus does history repeat itself.

Like many another fisherman, I don't care much for fish as a culinary item. This with the proviso that there are worse dishes than a brace of 14-inch cutthroat, nestled in a well-seasoned pan with a strip of bacon in each belly cavity and the merest dusting of corn meal on their speckled sides.

Perhaps even better is the trout that never ends up with peas and potatoes on a plate.

I've tangled with many such, and most stream days, take the loss of a good fish in the spirit of Father Walton, who points out that a man after all can't lose what he's never possessed.

Still, there have been trout that I dearly longed to keep. These were lunkers of the sort that an angler rarely hooks; their chances of escape are amplified by weight and strength and acquired wisdom.

Last year, when we came to the up-Island river that has twined its way in and out of our lives, I hooked such a fish on a floating fly in the lee of a toppled alder.

We tussled together long enough for me to work him close and see him all glorious where he finned suspended in water only less clear than air. Then he rolled on the trail leader, lunged, and went free.

Landed, such a trout can be forgotten. Lost, it is remembered forever—and lunks to swim into an angler's dreams on just such uncharmed winter days as these.

Boy Injured In Fall From Trestle

Lee Whitmore was a stick-in-the-mud Monday. It might have saved his life.

The 13-year-old and his buddy, Allan Quin, were wheeling their bikes across a railway trestle between Saanich Road and Quadra shortly after 5 p.m., when Lee's foot caught between two ties.

He toppled off the trestle, dropping about 35 feet into soft mud. His only injury was a broken collarbone.

Lee is the son of Mr. and Mrs. Garry Whitmore of 3115 Glasgow and with Allan, who lives at 3104 Quadra, was on his way home from a visit to his grandmother.

"It's a miracle he's even alive," Mrs. Whitmore said today.

She credits the soft mud below the trestle left by the winter's heavy rains as cushioning her son's fall.

Fire Damages 3-Storey Home At Langford

A fire around a furnace caused extensive smoke damage to a Langford home this morning.

The blaze broke out shortly before 10 o'clock in the three-storey stucco house of Mr. and Mrs. Fred Smith, 2757 Wentworth. Their three children were at school and Mrs. Smith was visiting a neighbor.

The fire followed furnace trouble during the night and came shortly after a power failure in the area, said Mrs. Smith.

It was spotted by a garbage man who first thought the smoke drifting from the room was steam.

One wall of the basement had to be pulled apart to fight the flames.

A Langford fire department official refused to comment on the blaze when contacted shortly before 1 p.m.

Parks administrator Herb Warren hopes soccer and rugby players in the city can "muddle through" 1967 without further date clashes.

He made the statement after the parks committee heard a letter of complaint from the Victoria Rugby Union that they had been eased out of Macdonald Park by Victoria O'Keefe's soccer team.

"The trouble was brought about by the closing of Royal Athletic Park and the general shortage of rugby fields in the area," said Mr. Warren. "I think the differences have been resolved and that we shall be able to muddle through until Athletic Park is finished when the problem will cease to exist."

Parks administrator Herb Warren told the parks committee this morning he would be more than happy to lay out mile-markers along Dallas Road and the cliff paths.

The entry fee will be \$1 after which the contestant will receive a special score card. On presentation of the card with Road the favored locations.

YMCA OFFERS REWARD FOR 100-MILERS

Silver Spoons for the Gasping

Citizens who can run 100 miles in 1967 will receive a special award from the YMCA.

Art Burgess, physical fitness director for the Y, has asked Victoria city council for assistance in marking out two mile courses to enable runners to log their century in miles.

Parks administrator Herb Warren told the parks committee this morning he would be more than happy to lay out mile-markers along Dallas Road and the cliff paths.

The entry fee will be \$1 after which the contestant will receive a special score card. On presentation of the card with Road the favored locations.

Rules for runners are that they must be 18 years or more; that they must run not less than one mile a day and not more than three miles a day.

The reward for logging 100 miles—all marked on special cards by the honor system—will be a silver spoon with a special crest.

A final decision on the Victoria mile courses (there will be two in each municipality) will be made by Mr. Warren with Beacon Hill Park or Dallas on route to the Caribbean for exercises with other units of the fleet. HMCS Mackenzie travelled south with her from Esquimalt. They'll be back in eight weeks, all hands tanned.

'WE DON'T WANT LEGISLATION'

By AB KENT
Times Business Editor

The Canadian auto industry will bring in safety features voluntarily in hopes of staving off government compulsion, a Brampton executive said here Monday.

Neil Gaskin, vice-president of sales for American Motors (Canada) Ltd., said most of the safety developments made mandatory by the U.S. government for the American auto industry will be put into Canadian production.

"We don't want legislation," he explained.

FEAR LAWS

"We are afraid of government legislation because it is not oriented to public demand."

In effect, compulsory safety features merely raise the price of the product to the disadvantage of the buyer, he said.

What the industry and the public both want is freedom of choice, the executive said.

Asked what he felt about the possibility of more embracing Canadian legislation, he said:

"Any more stringent law in Canada than in the U.S. would be asinine."

SIDE EFFECTS

Meanwhile, he expects side effects in Canada as a result of the American legislation.

By 1968 it is possible there will be mandatory anti-air pollution devices required on all new cars.

Such a device would have to be engineered into the auto, Mr. Gaskin said, and therefore "we would have no choice but to build it in," even though it would have limited usefulness in Canada.

\$50 PER CAR

The extra cost would be about \$50 per car, he said.

Seat belts are an example of the way manufacturers had been forced to comply with legislation, with little support from the motoring public, Mr. Gaskin said.

"Now we have to put extra things in cars to get rid of the seat belt, to roll it up oft of the way. I don't use the seat belt. Do you?" he said.

Crowded Class Statement Due in Session

Education Minister Peterson today said he will have an announcement to make on the pupil-teacher ratio later this session.

He was commenting on the B.C. Teachers' Federation proposal that its members will refuse to teach overcrowded classes, particularly those with 40 or more pupils.

"I'm sure the matter of pupil-teacher ratio, which I gather is the basis of their complaint, will be discussed at this session of the legislature," he said.

He declined to elaborate because he plans to outline his stand "either in the budget debate or when my estimates are before the House."

The asked that it be, if possible, on Centennial Square.

But the public works committee was informed this morning that there was no suitable accommodation in city hall.

Mayor Hugh Stephen suggested the Dowell Building.

Parks administrator Herb Warren hopes soccer and rugby players in the city can "muddle through" 1967 without further date clashes.

He made the statement after the parks committee heard a letter of complaint from the Victoria Rugby Union that they had been eased out of Macdonald Park by Victoria O'Keefe's soccer team.

"The trouble was brought about by the closing of Royal Athletic Park and the general shortage of rugby fields in the area," said Mr. Warren. "I think the differences have been resolved and that we shall be able to muddle through until Athletic Park is finished when the problem will cease to exist."

The asked that it be, if possible, on Centennial Square.

But the public works committee was informed this morning that there was no suitable accommodation in city hall.

Mr. Little also heaped scorn on the "drab" films that say nothing about British Columbia at all," he found in B.C. House during a visit to San Francisco.

The three total about an hour in length and will be shown free of charge at 8 p.m. in room 168 of the Elliott Building.

NO IMAGINATION

He said it was incredible to find that there was no color or imagination in the exhibits, that a picture of the premier was almost unrecognizable and pictures of the Queen and Prince Philip were hung behind a room divider of "drain pipe tile."

He said he watched passersby out side for some time and a "dismal grey cardboard model

A final decision on the Victoria mile courses (there will be two in each municipality) will be made by Mr. Warren with Beacon Hill Park or Dallas on route to the Caribbean for exercises with other units of the fleet. HMCS Mackenzie travelled south with her from Esquimalt. They'll be back in eight weeks, all hands tanned.

The entry fee will be \$1 after which the contestant will receive a special score card. On presentation of the card with Road the favored locations.

Car Firms to Institute Own Safety Features

The belt is just another cost item, he said.

Legislation is less desirable than demand, especially since Canada has five distinctly different market areas.

"Cars that people drive in the mountains are different from those people drive at sea level," he said.

Although the company had a \$12 million deficit last year, he

said that was of little consequence in a billion-dollar operation.

Besides, he said, the company had spent \$25 million on product improvement in the last 3½ years.

"What's a \$12 million loss if you are evolving?

"There's been a lot of publicity that we've borrowed

a lot of money. Everybody in the industry borrows money.

"We are in the car business and anybody who went out of business in the car business didn't do it by putting money into product. They did it by putting money into airlines or other things," Mr. Gaskin said.

Two Girls Badly Hurt In Esquimalt Mishap

INTERIOR MLA DIGS IN WITH HIS SPADE BEARD

William Hartley could stand the puzzled side-glances of fellow MLAs no longer.

Monday, in the throne speech debate, the NDP Yale-Lytton MLA confessed why he's wearing a spade beard—the first MLA to come unshaven into the house for many a year.

"This is centennial year," he said. "I have grown a beard styled after the beard of F. J. Barnard."

Mr. Barnard was a pioneer developer of a pony express during the Yale gold rush and also served as the first MLA for Yale-Lytton riding a century ago.

Dudley Little (SC-Skeena) fast earning himself a reputation as an independent thinker from the north, made the criticisms—and no softening plaudits—during the throne speech debate.

He said it is time the government struck a committee of the house to modernize antiquated liquor laws, pointing out every "straight-laced" old Ontario "has liberalized its attitude towards drinking to allow it on Sunday."

Mr. Little said he felt that better results should be obtained for the government's money by the San Francisco office. He did not mention commissioner Newton Steacy, who got the job after being defeated as cabinet minister, by name.

Mr. Little said that the province saves \$410 for each student who goes to a separate school and it should provide public grants to those who follow the department of education curriculum.

He said he received 3,000 encouraging letters after raising the subject at the last session and he may decide to formally propose a resolution on the controversial topic advocating duplication of Alberta's decision last year to assist approved separate schools.

Daff Downed By Nature's Fickle Ways

Weeks of gentle rain, a few hours' balmy soothng breeze, a few minutes of gentle Victoria sunshine and a daffodil was coaxed into life Monday.

Mr. Little also heaped scorn on the "drab" films that say nothing about British Columbia at all," he found in B.C. House during a visit to San Francisco.

The daffodil reported blooming on Pandora Avenue was hit with temperatures as low as 24 degrees overnight.

But Gonzales Hall weather station advised milder weather is expected tonight. That is, milder weather with rain.

A Pacific rainstorm is sweeping towards Victoria and should pass by Wednesday.

Vancouver weather office has issued a gale warning for Georgia Strait and the Strait of Juan de Fuca tonight. Winds up to 35 knots are expected.

Ask The Times

Q. The other day your paper had a story about some workers in the Company of Young Canadians. I would like to know how much this project is costing? W. H. C.

A. An official budget is not yet available; the act incorporating the Company was passed only last June. An earlier press report, however, described it as "a federally sponsored community project with a \$1,000,000 budget."

Q. What is the rest of the James James, Morrison Morison?"—Nostalgic.

A.—This poem "Disobedience" from Milne's "When We Were Very Young" continues:

Weatherby George Dupree
Took great
Care of his Mother
Though he was only three.
James James
Said to his Mother
"Mother," he said, said he:
"You must never go down to
the end of the town, if you
don't go down with me."

Anyone wishing a question answered in the paper, should address it to the Times' Editor. Questions and answers will be published daily.

'Spring Gold in Bloom! He Cried All A-Glitter'

By GLEN ALLEN

There it is, in the angle of two rocks, under the rain, by a pond, in the sound of the highway, tiny and bright as the spring gold.

"Spring gold," shouts the oldest, brightest face in the crowd, as if it were stardust he has found.

"Spring gold in bloom," shouts Skipper King, finder of flowers, inspector of weathers, knower of all things.

Any Saturday, sure as rain, sure as the robins and spring, Skipper King is finding some flower, greeting it like an old friend, showing its face and its name to young people who are coming to love nature as much as he does.

Part Socrates, part Thoreau and part Pied Piper, Skipper believes nothing that grows or breathes is without importance.

The 20 junior members of the Victoria Natural History Society who sloped around Thetis Lake Park after some in the rain Saturday, even the fat newspapermen and brave mothers and fathers, their hearts murmuring, were

excited when Skipper King found the Spring Gold. It's his way.

Seventy-six years old and with the style of a Gordie Howe, Skipper King has been shepherding boys and girls around southern Island parks since he retired 11 years ago.

"I'm standing over wild grape," he says.

Try smoking it and you'll see why it's wild," he says.

"First puff blows off your ears and the second, your head."

All year long at places like Thetis Lake, Mount Douglas, Witty's Lagoon and Goldstream Skipper teaches young people "what a half-baked naturalist" has learned in a lifetime.

Like this:

"We've got something here," he says to a ragged file of children behind him on the trail. "Something we missed."

"What is it, Ronnie?" says Ronnie.

"Right, but what kind?"

Ronnie doesn't know, but he learns.

Some of them some day

it will be worth as much as

the gold in that sprig of

Spring Gold.

Because when some day,

they find they can't roll back

the years and they can't, after

all, go home again, they will

remember Skipper King and

what they found one day in

the angle of two rocks under

the rain.

TELLING NATURE'S SECRETS
every Saturday for 11 years, Freeman "Skipper" King has interested thousands of Greater Victoria young people in everything from trees to

moss, from birds to bears. At 76, Skipper has energy of Himalayan conqueror, outclimbs and outruns most indefatigable of youngsters. (Photo by Glen Allen)

CHEMAINUS DIGS IN

Collision Due Tonight On Consolidation Bid

Island Digest

Night Run Asked For Freight

An interior MLA went to bat for Vancouver Islanders in the legislature Monday.

William Hartley (NDP-Yale-Lillooet) urged the B.C. Ferry Authority to start a night run if necessary in order to provide a mainland-island connection for drop trailer traffic.

"There has been much talk of the B.C. ferries . . . discontinuing the carrying of freight trailers and turning this business over to the CPR," he said in the throne speech debate.

"I would like to remind the government that CPR had this business at one time but they did not look after it."

HANG ON

"Now our B.C. ferries have this business and I suggest we hang on to it. Instead of curtailing our service, I suggest that special night runs be put in to handle freight — that is, regular runs after 11 p.m."

"If there is money in this for the CPR, then it should be possible for our ferry system to give even better service and still make money."

Impaired Driver Jailed 21 Days

Louis Planes, 39, of Milnes Landing, was jailed for 21 days Monday when convicted for the second time in 15 months of impaired driving.

The accused's car weaved over the centre line four times within a mile when followed by police on the Sooke Road Jan. 20, court was told.

Planes, who pleaded guilty, was convicted of the same offence in October, 1965. His driving licence was suspended.

Minor Had Liquor

James Weir, 19, of HMCS Qu'Appelle, was fined \$35 in central court Monday when he pleaded guilty to being a minor in possession of liquor.

He admitted ownership of eight bottles of beer police found in his car when they checked it Jan. 14 in Courtenay.

LADYSMITH — Opposing educational interests will clash head-on tonight at a meeting of District 65 School Board.

A majority of the school trustees are supporting submission of a \$1,000,000 referendum which will consolidate senior secondary students at Ladysmith.

Trustee Cyril White, Chemainus, will be voicing the strenuous opposition of Chemainus residents.

DEFEATED

When the consolidation issue was part of a composite referendum in November, 1965, it was overwhelmingly defeated by Chemainus, Saltair and Thetis Island voters.

Trustee White is expected tonight to press for development of senior secondary education at both Ladysmith and Chemainus.

He will also ask the board to seek stopgap senior secondary schooling at either Nanaimo or Cowichan district schools on a fee-paying basis.

★ ★ ★

LADYSMITH — A ladysmith dogs are having their day.

Monday evening Mayor Kay Grousel admitted: "Our year-old dog bylaw is useless unless we have a pound or a means of arresting stray dogs."

"People have called our bluff by buying licence tags but not putting them on their dogs."

Council reluctantly accepted the resignation of the commissioner appointed a year ago to enforce the bylaw.

TOO COSTLY

Mayor Grousel said the council last year did not pursue further the question of a pound because it involved a building, vehicle and a dog-catcher.

She reminded council Mother Cecilia of the Good Shepherd Shelter at Mill Bay last year offered to take Ladysmith's stray dogs and provide a vehicle one day a week to round them up.

Mayor Grousel said: "People would not be so casual about letting their dogs run at large if it cost them a trip to Mill Bay to redeem them."

"A 20-mile trip might even make them consider giving up having a dog."

"The problem at the moment is you can't penalize an unlicensed dog."

FEW COMPLAIN

James Runciman, clerk, said there are few residents' complaints at present whereas this

Drag Racing: Harmless Steam Safety Released

line. You and your car have to run as a team.

"There's no use buying high-priced speed equipment if you can't tune it to perform well."

Jim wasn't a crazy teenager when he started drag racing. He first gave it a whirl five years ago when he was 23.

The first two years on the Victoria Quarter-Mile Club track at Cobble Hill he didn't win a thing.

He was driving a Model A Ford with a flathead 200 H.P. motor. From that he graduated to the same model car with an engine developing 450 horsepower.

Jim raced that powerhouse

for four years in "B" gas events on the island and on tracks in Washington.

Jim, who owns and operates a local gas station, invested \$4,000 in the car which also did duty as his two vehicle and general run-around transportation.

Switching to a 425 h.p. Corvette, Jim knocked his quarter-mile time down to 12.5 seconds from a standing start.

This has been his fastest time to date, but Jim will be racing again this year.

To cover a quarter-mile in 12.5 seconds from a standing start, a car has to reach a top speed of 120 miles an hour.

He is particularly proud of his record last season when he collected most points for

Jim said: "A year ago I wanted to give up the racing habit but it had become too much a part of me."

"I was on the sidelines six months but eventually broke down and bought the Corvette to compete on equal terms on American tracks."

Jim won his first trophy in 1963 and only mechanical failure has kept him off the prize list since.

Once at Spokane he entered a class with 50 cars all potentially faster than his own and still came third.

He is particularly proud of his record last season when he collected most points for

Vancouver Island and was awarded the Best Sportsman of the Year Trophy.

His buddy Mike Stogrin said: "Jim always has time to help out the next guy whether or not he's a competitor."

Jim claims drag racing is the safest automobile sport in the world, and safer than many sports where no vehicles are involved.

He said: "The safety regulations are so strict that even if there is an accident there's seldom any injury."

Drag racing is the fastest growing sport in the United States and public attendance

last year exceeded that at either football or baseball.

Even Cobble Hill events attract up to 3,200 fans.

Mike Stogrin is trying to raise \$100,000 to start his own drag racing strip in the Cobble Hill area. He has already bought the land.

The Cobble Hill events are run over the private B.C. Cement road which is donated for use by the company.

Jim Loiselle says: "Every drag racer is an experiment in himself and any good idea which shows up in his racing will eventually show up in some aspect of automobile manufacture."

'Bothered' Driver Fined for Hit-Run

A Duncan man who fled from an accident and then gave himself up to police was fined \$250 Monday.

Richard Sigurdson, 21, pleaded guilty to failing to remain at the scene of an accident and to careless driving when he appeared in central court in Victoria.

Police said the accused was southbound on Douglas when he hit another car at the Bay Street intersection Saturday night and kept going.

Sunday he reported the accident at the Duncan RCMP office where he told officers the incident had "bothered" him all night.

Sigurdson admitted going through a red traffic signal in the accident which resulted in about \$350 damage.

In judgment on another charge of leaving an accident scene, Magistrate Oster Monday barred Kenneth McLaughlin of 2916 Blackwood from driving George Wilson

Rich Mineral Strike Made Under Water

By AB KENT
Times Business Editor

The most exciting mineral discovery since the molybdenum balloon went up five years ago has focused scientific mining and political attention on B.C. undersea territories.

Evidence of rich deposits from an underwater peak in Jervis Inlet, lying east of Vancouver Island 80 miles north of Vancouver, was confirmed Monday night by Mines Minister Donald Brothers.

The find is in the form of nodules containing a high percentage of manganese oxide, nickel and copper.

A three-man research team from University of B.C. discovered the occurrence and has been sitting on the story since last June.

To stop a rush of speculation and promotion, the B.C. cabinet Monday passed an order reserving to the Crown all minerals rights lying under tidal waters.

EXPLORATION

It stops any person from gathering samples, drilling or digging in connection with offshore exploration without prior approval of the provincial government, whether or not the

'Topple Sukarno'

JAKARTA (Reuters) — Foreign Minister Adam Malik today called on Indonesian Army strongman Gen. Suharto to use any means, including force, to topple President Sukarno. Malik said the only way to end divided leadership in running the country's affairs was to use the emergency powers given to Gen. Suharto last March 11.

Ottawa Protests New Freight Levy

OTTAWA (CP) — The transport department has made a strong protest to the European Pacific Coast Freight Conference over its sudden 10 per cent surcharge on shipments out of Vancouver.

Transport Minister Pickersgill told the Commons today the new levy on shipments to Atlantic ports by the European shipping group was made "without any prior consultation with the national harbors board."

Mantle Signs Again for \$100,000

NEW YORK (AP) — Mickey Mantle signed his fifth consecutive \$100,000 baseball contract with New York Yankees today.

The 35-year-old outfielder will be switched to first base at the start of spring training, it was also announced at a press conference. The switch-hitting slugger will be starting his 17th season with the American League Yankees.

Malta Grounds British Planes

VALLETTA, Malta (Reuters) — British military aircraft stationed here were grounded today after the Maltese government stopped supplies of duty-free fuel, an RAF spokesman announced. The fuel cut, which did not affect civilian aircraft, was part of Malta's campaign against a British decision to reduce forces on the island by two-thirds to save costs.

Stolle Beats Ralston in Opener

BRISBANE, Australia (AP) — Fred Stolle of Australia defeated Dennis Ralston of Bakersfield, Calif., today 6-3, 10-8 in the professional tennis debut of both players.

Stolle was ranked the world's No. 1 amateur.

'End the Bugging Probe, Pass New Laws'—Stupich

Premier Bennett Monday was asked to dismiss the Sargent Royal Commission on 'bugging.' Dave Stupich (NDP — Nootka) told the legislature the royal commission is not needed to protect people against electronic eavesdropping.

What is needed, he said, is legislation to end the evil. The Sargent commission seems far more interested in 'listening in' on private conversations than in investigating the extent of bugging," said Mr. Stupich in the throne speech debate.

"They just want to get in on the eavesdropping," he added.

Speaker W. H. Murray asked Mr. Stupich to show more respect for the commission.

"I don't have any particular respect for it," Mr. Stupich replied.

VICTORIA, B.C., TUESDAY, JANUARY 31, 1967 — 26 PAGES

NEW CHINA WALL RISES BUT IT'S IN MOSCOW

MOSCOW (Reuters) — Workmen today completed the erection of a six-foot-high wooden wall around the Lenin Mausoleum in Moscow's Red Square, apparently to forestall possible Chinese demonstrators.

A policeman in the square said the wall was erected because of repairs to the mausoleum, which would stay closed to visitors for two months.

Nearly 70 Chinese students were involved in a melee with Russians outside the tomb last Wednesday, and the Chinese Embassy later claimed 30 were beaten by Russian police.

CLAWED AT CAPSULE HATCH

Tape Caught Screams Of Dying Astronauts

TWO TRAILERS SEIZED IN JONES ACT TEST

SITKA, Alaska (AP) — The United States Bureau of Customs placed two house trailers under constructive seizure under the provisions of the Jones Act today in a case shaping up as a major test of the federal law.

Hillard F. Everson, a customs agent from Juneau, seized the two trailers, owned by Sal Cucigliari of Sitka, when they arrived aboard the state ferry Matanuska, then left them in Mr. Cucigliari's custody.

The provision of the Jones Act forbids the transportation of goods from one U.S. port to another on a foreign flat vessel.

Mr. Cucigliari's trailers were transported from Caldwell, Idaho, to Prince Rupert, B.C., making part of the journey via the British Columbia ferry system, and then were placed aboard the Matanuska for delivery to Sitka, their final destination.

The Washington Star, quoting a space-agency worker at the manned spaceflight centre in Houston, said there were about 15 seconds of "horrible screaming" following the first report of fire.

ROOKIE IDENTIFIED

The Star's report said the informant, who heard the tape at Houston and asked not to be named, identified the voice on the tape as that of the youngest of the crew, Roger B. Chaffee, 31.

The Times' story gives this account:

The astronauts' last moments, clocked at 12 seconds, were described by an engineer who spent most of the day listening to tape recordings of the fatal test and who heard reports from men on the launching pad at the time of the tragedy.

Chaffee and Lt.-Cols. Virgil I. (Gus) Grissom and Edward H. White II of the air force were scrambling, clawing and pounding to open the sealed hatch and escape the inferno in their Apollo cockpit, the source said.

NO RELEASE BUTTON

But the hatch was unyielding,

he said, and they had no time to reach for the ratchet that is normally used to unscrew it.

There was no automatic release button.

The first hint of trouble, according to the source, came in almost casual tones.

Rain an' frost ain't so bad when they ain't simultaneous.

Oxygen Blaze Kills Another

Fatality During Space Experiment

SAN ANTONIO, Tex. (AP) — A fire similar to the one that killed three Apollo 1 astronauts Friday at Cape Kennedy, Fla., raced through a space cabin simulator today at the School of Aerospace Medicine, killing one airman and critically injuring another.

Initial reports said the inside of the pressure chamber was "completely charred" as was the Apollo craft at Cape Kennedy.

A Brook Air Force Base spokesman said the airmen were performing maintenance in a pressurized environment of 100-per-cent oxygen in an experiment designed to study the effects of pure oxygen on the blood of rabbits.

Ten of 12 rabbits in the chamber were killed. The spokesman said the airmen were in the chamber to monitor and tend to the rabbits.

The atmosphere chamber is a large rectangle with part glass on one side and with double atmospheric locks, so that a person can go into a tiny room, close the door, and then open another to step into the main chamber to prevent the pressure dropping.

The cabin, essentially a long steel cylinder, is in the centre of a large space chamber building. Related experiments are often conducted with volunteer airmen accepted from among basic trainees.

CHAMBER HAS HATCH

The chamber, about 20 feet long, sits on a three-foot-high foundation. Overall, it is about nine feet high, allowing a man to stand up inside, where the diameter is some six feet. There is a hatch at one end.

The Apollo capsule, on the other hand is a 12-foot-high cone-shaped vehicle. It is 12 feet, 10 inches across at the base and weighs 12,000 pounds.

One observer said that, although the pressure in the Apollo was considerably greater than in the San Antonio chamber, the pure-oxygen environment would tend to make the fires burn similarly.

The chamber's pressure simulated that experienced at 18,000 feet altitude.

STUDY of methods developed in Sweden to keep industrial peace will be made by Mr. Justice N. T. Nemetz it was announced by Labor Minister Peterson in the Legislature today. The Supreme Court justice is expected to go to the Scandinavian country later this year for an on-the-spot check of the labor-management committee system. He will report back to Mr. Peterson.

Montreal Snarled By Strike

MONTREAL (CP) — The 4,500 white-collar workers employed by the City of Montreal are preparing for a long strike after walking off the job Monday, closing city hall, municipal courts and the social welfare department.

The strike is due to a dispute over wages. It brought municipal government to a standstill.

The city's 5,000 manual workers have set a walkout for Feb. 10 to back up their pay demands.

Representatives of the 3,400-member Montreal Policemen's Brotherhood are scheduled to meet today to reconsider salary proposals which the men rejected the first time round. Their contract expired Dec. 1 and union spokesmen say the police may have to hold study sessions if their demands are not met.

The collective agreement for Montreal's 2,350 firemen expired at the same time. However, negotiators for the firemen's union said they are waiting for the city and the police to settle their differences before resuming talks.

The city has said it expects to submit a "final" pay offer to the office workers Thursday.

The white-collar workers are members of the National Union of Municipal Employees, an affiliate of the Confederation of National Trade Unions.

They have demanded a 20-per cent increase over two years plus a flat \$700 for each member. The men earn an average of \$5,600 a year.

Marriage Too Important to Waste On Children, Women's Group Says

OTTAWA, (CP) — The legal age for marriage should be raised to 21, the National Council of Women of Canada said in a brief today to the parliamentary divorce committee.

The brief said marriage may break down because persons enter into it "at too young an age." The present minimum age for marriage without consent of parents is usually 16 in Canada.

Amendments to the divorce act should be approved by each province at its own discretion.

Another recommendation asked that the wife be allowed to sue for divorce in the province where she lived with her husband. At present, the wife

must sue in the province where the husband now lives.

The brief said changes may have to be made in divorce court structure to lower the cost of divorce.

The lack of money required to institute the legal process to obtain a divorce has caused many people to live common law.

This illegal state caused suffering to children of such a union and engendered lack of respect for the law and the marriage state.

PENETRATES DEFENCES

U.S. Develops Better Missile

WASHINGTON (AP)—The United States has developed advanced nuclear-tipped missiles which have a better chance to penetrate anti-missile defences, the Atomic Energy Commission said today.

The development could play a part in the pending U.S. decision on whether to build an anti-missile defence system or rely on offensive capability as a deterrent to war.

Last year Defence Secretary Robert McNamara said the Soviet Union had deployed elements of an anti-missile defence around Moscow.

President Johnson has called for Soviet co-operation to end any anti-missile race. But for fiscal 1968 Johnson has budgeted contingency funds for the start on a U.S. anti-missile system if such a race develops. The price tag of a complete system could reach \$40,000,000,000.

In its annual report to Con-

"May I call you comrade?"

SCREAMS

Continued from Page 1

"Fire . . . I smell fire," an unidentified astronaut reported over the intercom.

Two seconds passed.

"Fire in the cockpit!" cried Col. White. This time the voice was sharp and insistent. It was identified as Col. White's by Donald K. Slayton, a former astronaut and now chief of crew operations.

There was silence for three seconds—then an hysterical shout from an unidentified astronaut:

"There's a bad fire in the spacecraft!"

A longer silence followed, about seven seconds. There were sounds of frantic movement, unintelligible shouting. Finally, after another four seconds, Chaffee cried out the last words of distress:

"We're on fire . . . get us out of here!"

Meanwhile, it was learned that four men were burned critically in an electricity-induced fire in an oxygen-filled chamber at Philadelphia in 1962.

A similar accident in a space-cabin simulator at Brooks Air Force Base, Tex., the same year, involving a fire of unknown origin, caused two men in the chamber to lose consciousness.

These and other fire accidents in space-cabin experiments, said a 1964 report prepared for National Aeronautics and Space Administration, "Illustrate in concrete fashion the potential dangers of 100 per cent oxygen atmospheres."

Furthermore, the report said, an earlier space-cabin fire threat developing from the overheating of a television tube, was averted so handily it gave experimenters a "false sense of security."

An RAF scientist said in London that British experiments had shown a danger of sudden fire in Apollo spacecraft.

He said the results of the experiments were reported to NASA before the tragic Apollo fire.

Fit. Lt. David Denison, a leading authority on oxygen fires, led a group of British space medicine experts in the experiments at Britain's Institute of Aviation Medicine.

He said the experiments used dummies and dead animals wearing chemically-treated suits in an all-oxygen atmosphere which duplicated the all-oxygen atmosphere of an Apollo capsule.

Denison said small sparks in such an atmosphere brought an outburst of flames causing almost immediate death.

"We certainly do not criticize the Americans," he said.

"Their choice of a pure oxygen system for the space cabin may well be the right choice. It is their job to balance up the many risks."

"What we did was to bring out that the character of fire is unexpectedly swift and savage in a pure oxygen atmosphere."

Meetings Calendar

Queen of Peace Council, Catholic Women's League, Wednesday at 8 p.m., parish hall, 849 Old Esquimalt Rd.

World Ship Society, Wednesday, 8 p.m., Maritime Museum,

WEATHER SYNOPSIS

Under mainly clear cold skies, temperatures ranged from 12 below at Fort St. John to 34 at Victoria overnight.

The sunny skies, however, will come to an end today as a Pacific storm approaches the coast. Rain will spread to the coast by evening. The rain will move inland through the southern interior tonight while snow will occur in the northern sections. Rain is expected to change to showers along the coast behind the disturbance.

DOMINION PUBLIC WEATHER OFFICE 9 A.M. FORECASTS*

Valid Until Midnight Wednesday

Victoria: Rain beginning this evening. A little milder tonight. Winds light increasing to east-south 15 this afternoon and reaching 33 near Juan de Fuca Strait tonight. Low tonight and high Wednesday, 40 and 45.

Vancouver: Rain changing to showers Wednesday afternoon. Milder tonight. Winds light increasing to southeast 20 tonight. Low tonight and high Wednesday at Vancouver, 28 and 45.

Georgia Strait: Rain beginning this evening. Rain changing to showers Wednesday afternoon. Milder tonight. Winds light increasing to southeasterly 20 this afternoon and to 35 in exposed areas tonight. Low tonight and high Wednesday at Nanaimo, 28 and 45.

West Coast: Becoming cloudy

this afternoon with rain over northern sectors in early afternoon spreading to southern areas by evening. A little milder tonight. Winds light increasing south-easterly 33 this afternoon. Low tonight and high Wednesday at Tofino, 38 and 45.
